The Ancient Temple of Pandva's Bhimeshwari Goddess.

India has been the land of saints, fakir's and Mahatmas from the ancient time. The ruins of temples of Mahabharata time are found in the whole country. In Beri a huge fair is held at the occasion of Navratra's twice in a year. In the famous temple of Bhimeshwari Devi lakhs of devotees from all over the country come and worship the goddess. According to the well-known story, it is named, Bhimeshwari due to the installation of the idol of the goddess by Bhima.

According to the saying before the beginning of the battle of the Mahabharata period Shri Krishna told mahabali Bhima to bring his kuldevi to the battlefield of the Kurukshetra and take the blessing from her. The goddess accepted the request of Bhima but laid down a condition, she said that she was ready to go with him but if he dropped me down on the way from the lap then she would not proceed further. In the way Bhima felt the desire to go to toilet so he placed the idol of the goddess under a tree of Beri from his lap. After that when he tried to lift the goddess than he remained her condition, under compulsion, Bhima placed the goddess near the bank of the pond and went to Kurukshetra after seeking the blessing for victory.

	Town Directory Statement VII - Civic and other amenities in slums, 2009	272
	Appendix to Town Directory - Town showing their outgrowth with population	274

FOREWORD

1. The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socioeconomic characteristics of population at the lowest administrative unit i.e. of each Village, Town and Ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified Slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre,

Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i)-Status and Growth History of Towns,(ii)-Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)-Educational, Recreational & Cultural Facilities, (vi)-Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Smt. Neerja Sekhar, IAS, Director of Census Operation, Haryana. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

New Delhi.

(C.Chandramouli)
Registrar General &
Census Commissioner, India

Preface

The District Census Handbook (DCHB) is one of the important and most valuable publications of Census Organisation which is brought out for each district. It contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructural facilities etc.

DCHB reflects an overview of the district and is widely used by administrators, planners, academicians, researchers, various departments and general public. For DCHB publication, population data was taken from Census 2011, whereas non-census data was collected with the active collaboration of State Govt.

The Census 2011 was conducted under the able guidance of Dr. C. Chandramouli, IAS, Registrar General & Census Commissioner, India. The credit of the successful accomplishment of this huge task goes to him for his tremendous and spontaneous work. On behalf of this Directorate I am highly grateful to him and also extend my thanks to Sh. Deepak Rastogi, Additional Registrar General for timely guidance. I extend my thanks to Dr. Pratibha Kumari, Assistant Registrar General (Social Studies), under whose guidance this publication was finalised. Further I extend my special thanks to Sh. A. P. Singh, Deputy Registrar General (MAP) and Sh. A.K. Arora, Joint Director, EDP, who took great pains in bringing out this publication.

I am very grateful on behalf of this Directorate to Smt. Neerja Sekhar, IAS, the then Director under whose able guidance the specified task was mostly completed and I would like to acknowledge all the staff members of DCO Haryana, particularly the team headed by Sh. Vinod Kumar Babbar, DDCO, Sh. B.V.L. Sai Sekhar, the then ADCO and the entire team of DCO Haryana. Lastly I record my appreciation for the best efforts put in by the staff of DCHB, Map and Census Sections.

I hope this publication will provide more useful information for all the data users.

HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socioeconomic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its

coverage was enlarged by including details on all slums instead of ‘notified slums’.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i)-Status and Growth History of towns,(ii)- Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)- Educational, Recreational & Cultural Facilities, (vi)- Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

Brief History of the District

The history of the district from the Rigveda period to Budha era is shrouded in mystery. The later historical researches showed that the area remained under the influence of Indo-Greeks, Saka and Kushan Empire. The above fact is corroborated with the discovery of coins of Gondophernes. The archaeological excavations in the area were undertaken for the first time in 1879 by Mr. Wood, the then Administrative Officer. Antiquity of the present areas of the Jhajjar district remained obscure. A systematic and extensive excavation undertaken by Silak Ram proved that the area was inhabited by a variety of cultures.

During the Delhi Sultnate and the Mughal period, the Jhajjar area hogged the limelight. Some historians call Jhajjar city a town of medieval age. According to a legend, the town of Jhajjar was founded by Chajju Jat about 1300 years ago.

The Tomara Rajputs ruled over 'Haryana' from Delhi when the Ghazanavids invaded India from the north-west. Ghazanavids annexed kingdom of Lahore by 1020. The Tomaras of Delhi and Ghazanavids of Lahore made no attempt to outst each other. In this way, for about a century and a half, the Muslims and the Rajputs co-existed. The position, however, changed with the fall of Lahore into the hands of the Ghuris and the Tomaras of Delhi were overpowered by the Chahamanas of Ajmer.

Muhammad Ghuri came in 1192 to defeat Prithviraja Chauhan, he destroyed the most important town of Maham in conquering this part of Haryana. At that time, Jhajjar area was a deserted forest of Delhi and most adjoining area and villages were devastated in war. The Sultanate of Delhi was established in 1206 which depended on the support of Muslim nobles. Rohtak and Jhajjar areas on account of nearness to Delhi influenced struggles among the aspirants for the throne of Delhi.

Firoz Shah Tughlaq (1351-88) is said to have dug a canal from Sutlej to Jhajjar Town. During the Mughal period, territories in the Jhajjar area often changed hands as a consequence of constant fighting between the Sikhs, the Jats, the Marathas and the Rajputs. During the rule of Akbar, this area was part of Delhi province.

After the fall of the Mughal empire, there was again an atmosphere of turmoil. Farrukh-Siyar handed over this area to his minister Rukn-Ud-din in 1718. Even he could not handle and a few years later handed over the area to the Nawab of Farrukhnagar. Maratha chieftains Holkar and Scindhia were also engaged vigoursly in extending their territories in this area. During this period Raghu Nath Rao and Malhar Rao Holkar with the help of Maratha military attacked on Nawab and charged heavy tax. Under the leadership of Maharaja Suraj Mal, jats defeated the Nawab of Farrukhnagar and established their rule. After that from 1785 to 1803, the area was again under instability.

George Thomas, an Irish adventurer was an extremely courageous personality and was a remarkable character in the history of Jhajjar area. Coming to India in 1780-81, he remained for a short time in the service of Begum Samru before being adopted by Appa Kandi Rao as his son. This Maratha Chieftain operating under the overlordship of Mahadaji Scindhia, gave parganas of Jhajjar, Beri, Mandothi and Pataudah to George Thomas in return for the forces which he was required to maintain. It was a gift only in name. In the beginning George Thomas succeeded only in obtaining possession of Beri, eventually he asserted his authority over the adjacent territory, made Jhajjar his headquarters and in view of security, constructed a fort at some distance and named it Georgy garh (modern Jahazgarh). After consolidating his position at Jhajjar, he thought of establishing an independent principality

for himself in the tract known as Hariyana. Accordingly he established himself at Hansi. He had to campaign against Rajputs, Sikhs and Marathas to retain his territories. Thomas was outmatched in numbers when the siege of Georgegarh began, betrayed by several of his chief officers he fled to Hansi and abandoned his claims to power.

Within a period of two years after desertion of George Thomas, the increasing power of Scindhias was destroyed by the British army under General Lake. As a result of treaty in 1803, the area came under the control of East India Company but General Lake decided to establish small feudatories in the middle of area between the Sikhs and East India Company ruled area which would safeguard the area of the Company.

In this distribution, the area of Beri was given to the nawab of Dujanas, the area of Jhajjar to Nawab Nijabat Alikhan and the area of Bahadurgarh was given to his brother Nawab Ismail Khan. Patoda and Kheri Village were given to Faiz Muhammad Khan, the son of Ali Khan.

Nawab Nijabat Ali Khan lived in Delhi. He handed over the responsibility of the administration of Jhajjar to his son Faiz Muhammad Khan in 1813. Faiz took keen interest in the progress of Jhajjar. He got constructed many buildings, the work of salt-making was started, many deserted villages were rehabilitated and a dam was constructed near Badli Village. The last Nawab of Jhajjar Abdur Rahman sat on throne in 1845. Ranghars and Jats who had been serving in the regular regiments of the East India Company were discontented in large numbers with their British Masters. In 1857, Collector of Rohtak requested the Nawab for military help to crush the revolutionists. But the request of the Collector was declined as Emperor Bahadur Shah also wanted the Nawab to participate in the revolution; the Nawab supported revolutionists and sent his military in their support. But the Britishers captured Delhi again. The Nawab had to surrender before Colonel Lawrence on 18th October, 1857 in Chhuchhakwas, later on tried and sentenced to death in front of Red Fort in Delhi.

After the struggle of 1857, Jhajjar came direct under the British Rule and was constituted as a new district but was abolished in 1860 and it was made a tahsil in Rohtak district. Apart from the Jagirdars who were punished for their anti-British activities during the uprising of 1857, the Rohtak district (including Jhajjar) itself suffered a set-back. It was not included in any of the developmental programmes. Thus it remained a backward district. The resources of peasants were crippled because of many years of draught and famine after 1895.

Arya Samaj movement accelerated the desire for reform. The movement spread soon to Jhajjar, Sanghi, Maham and Mahra after Rohtak. At this stage, a local leader, Chhotu Ram appeared on the scene whose dynamic personality exercised a deep influence on public life. Born in Jat family in Garhi Sampla, he shifted to Rohtak and practised as a lawyer in 1912. He founded Jat Sabha and published 'The Jat Gazette' in 1916 publishing interests of rural masses.

In response to the call given by Mahatma Gandhi in 1919, hartals were observed and demonstration held in March-April at Rohtak, Sonipat, Jhajjar and Bahadurgarh as a protest against Rowlette Act. As an all India Programme, Jhajjar Congress Committee in 1921 responded to the efforts by hoisting Congress flag at Town Hall.

India became Independent on 15th August, 1947. Jhajjar areas remained tagged with Rohtak till the appearance of Jhajjar as an independent district for the second time on 15th July, 1997.

ANALYTICAL NOTE(i)Physical Features:

Location and Size :

Jhajjar district lies between 28° 21' 31" N and 28° 50' 19" N latitude and between 76° 17' 06" E and 76° 58' 15" E longitude. It has a geographical area of 1834.00* sq. kms containing 1752.88 sq. kms of rural area and 81.12 sq. kms of urban area.

The district is located adjacent to Delhi State and South of Rohtak district. It has almost central position in southern Haryana. It is bounded by Rohtak and Sonapat districts in the north, by Rewari and Gurgaon districts in the south. To its west lies Bhiwani district and in the east lies Delhi, the National Capital.

Physiography:

Jhajjar district lies at the confluence of Indo-Gangetic Plain of north east and Sandy or Bagar Tract of west and Aravalli Offshoots of south. The district has varied topography ranging from sandy tracts, remanants of Aravalli Offshoots and Upland Plain area. Physiographically, the district can be divided into three sub parts (1) North Eastern Upland Plain, (2) Jhajjar Lowland and (3) Sandy Tract. North Eastern Upland Plain offers minor variations in topography with low lying ridges running in north-south direction as remanants of Aravallis. Jhajjar Lowland has variable slope tendencies and resultant topographic differences. This topographic variation is responsible for the formation of trough like depression in south eastern part of the district. Sandy tract located in the western and south western parts of the district is covered with sand dunes. The last two topographic regions are different from the Upland Plain of the North in that land slopes from the south to the north in these regions. Starting with elevation of about 800 feet in south to 710 feet above sea level in the north in Jhajjar Town. Region is infested with permanent sand dunes and few small rocky hills in south-west.

Drainage:

The only stream entering the district is Sahibi that flows from the south and enters the district from the south eastern part of Jhajjar tahsil only to lose itself and disappear within a few miles of the boundary. The Sahibi stream has its origin in Mewat hills which are remanants of the Aravalli mountain system and then entering Rewari district and finally disappearing in Jhajjar district.

During rainy seasons, the water instead of flowing into some river follows a course directed towards inland depressions in the whole district and these areas get flooded. Canals, sub-branches, distributaries emanating from Delhi Branch of the Western Yamuna canal irrigate the district. To tap the rain water, drain number 8 enters the district from North and reaches Bhindawas Jheel, then water is drained off to Najafgarh Jheel through link drain which takes westward direction from Bhindawas Jheel.

Climate :

The climate of the district is characterised by its dryness and extremes of temperature and scanty rainfall. The district has a sub-tropical continental monsoon climate where we find seasonal rhythm, hot summer, cool winter, unreliable rainfall and great variation in temperature. Air is generally dry during the greater part of the year. Scorching dust laden winds that blow during hot season render the weather very tiring. Dense fog sometimes occurs during winter months.

Four seasons are observed in a year. Mid-March to end of June is intensely hot summer season, followed by monsoon (rainy) season from July to mid-September, after which a transition period of two months follows. Then comes the cold season from mid-November to

mid-March. With the start of cold season temperatures begin to decrease rapidly. In the absence of meteorological observatory in the district mean meteorological conditions prevailing in the surrounding districts is taken as representative of the district in general. January is the coldest month when mean daily maximum temperature is about 21.2°C and mean daily minimum at 6.4°C. Cold waves affect the region in the wake of passing western disturbances and the minimum temperatures drop down to about 2.1°C to 3.1°C occasionally. The highest maximum temperature recorded at Rohtak in the adjoining district was 46.6° C on June 11, 1972 and the lowest minimum temperature was 0.2°C on December 30, 1973.

With the onset of summer season, temperatures begin to rise rapidly. May and June are the hottest months. The mean daily maximum temperature during May is around 39.5°C. On individual days the day temperature may occasionally exceed 44.2°C. Hot westerly winds locally known as ‘looh’ begin to blow from the month of April. With the beginning of monsoon season, day temperatures drop appreciably whereas nights continue to be as hot as in summer. During rainy season, weather is unpleasant due to increased moisture in the air. After monsoon season day temperatures remain high but night temperatures go down rapidly.

Rainfall records (2005-2009) reveal that average annual rainfall in the district is 542.5 mm. and about 80.0 per cent of the normal annual rainfall in the district is received during June to September, July being the rainiest month. Rainfall generally increases from west to east. Rainfall in the month of June is significant mostly in the form of thundershowers. The variation in the annual rainfall from year to year is very large. On an average there are 29 rainy days in a year. The heaviest rainfall in 24 hours recorded at Rohtak in the adjoining district was 298 mm on June 30, 1981.

Winds are generally light in the district with some strengthening in force during late summer and monsoon seasons. Cloudiness is moderate to heavy during monsoon season, rest of the year skies are generally clear or lightly clouded. Easterly or south easterly winds blow during monsoon season but for the rest of year, winds are westerly or north-westerly. Air is dry for most part of the year. Relative humidity is generally high in the mornings during monsoon season and from December to February. During summer season relative humidity is as low as 28 per cent in the afternoons. Thunderstorms occur throughout the year but the highest incidence is during monsoon season.

Natural Resources

Forestry :

The district covers Jhajjar, Beri and Bahadurgarh forest ranges headed by the Range Forest Officers. These ranges come under Rohtak Forest Division under the charge of Deputy Conservator of Forests stationed at Rohtak. Rohtak Forest Division comprises the forests of Jhajjar and Rohtak districts. The Division falls in South Forest Circle with headquarters at Gurgaon.

The area under regular forests in the district is very small. Only poor uncultivable area are left for Forest Department for developing forests. Forests owned by corporate bodies and private individuals are included under private forests. The forests of the district mainly consist of waste strips on either side of the roads, canals and railways and some private lands. These strips are unfit for agricultural purposes and therefore are managed by the Forest Department for afforestation. Rohtak Forest Division is actively engaged in intensive implementation of farm forestry, afforestation and regeneration programmes. Plants like shisham, neem, siris, jamun, kikar, drek and ornamental plants like amaltas and goldmohar

are raised in a number of forest nurseries for plantation in different forest areas.

Minor forest produce consists of grasses like kana, mallah (palla) and gum etc. Shisham (*Dalbergia sissoo*) provides the best timber for furniture. Kikar (*Acacia nilotica*) Israili kikar (*Acacia tortilis*), neem, siris and jand provide firewood and timber. Sarkanda grass is used for thatching. Lopping of jand (*Prosopis cineraria*) provides fodder during winter. Bhindawas lake is the winter home for a large variety of migratory birds. Bhindawas and Khaparwas bird sanctuaries extend on 1016.9 acres and 204.4 acres respectively.

FOREST TYPES IN JHAJJAR DISTRICT, 2010-11

Sr. No.	Type of Forest	Area (Sq. kms.)
1	Reserved Forests	----
2	Protected Forests	38.3
3	Unclassed Forests	0.5
4	Forests under section 38 of IFA, 1927	----
5	Forests under section 4&5 of LPA, 1900	2.1
Total Forest area		40.9

Source: Haryana Forest Department (Overview) Panchkula, 2011

The trees of various varieties are found along the roadsides and banks of old canals which include Shisham, Siris, Mulberry, Mango, Peepal, Gular, Barh, Lasura and Simbal. Small trees/Kair/Beri/Jharpala grows abundantly in unweeded fields and provides valuable fodder. According to Champion and Seth's classification the natural flora of the tract can be classed as Northern Tropical Thorn Forests. The District has no reserved forests and there is nothing particular about the flora of the district. Various kinds of trees and shrubs grow in different localities. On account of pressure of population and extensive cultivation very little has been left of the natural forests. Wherever present, these are of the open evergreen scrub or thorn type consisting mostly of the following trees and scrubs:

The common climbers seen here are *Coccinea cordifolia* (Kutra, Kundru) *Maerua arenaris*, *Pergularia daemia* (aaksan), *Rynchosia minima* and others. During the rainy season, a number of herbs appear on the ground giving it a green appearance. Among these herbs may be recognised species of Hulhul, Kankawwa or Kana, Khurand, Bhphali, Kag-roti, Tandla, Kulfa, Pawad, Santhi, Bhankdi, Kasni, Basuti etc. In waste lands Bhangra, Bichu, Kutra, Bhurat is commonly seen. Other plants growing in waste lands are Akk, Kala Bhangra, Satyanasi or Kandiyari, Rissa or Katola etc.

Some of the characteristic plants of the sandy tracts are Dholphulio, Jawasa, Rattanajot, Meini, Farid-buti, Khip, Harmal, Malha/Jhad/Beri etc. Many of them are used medicinally. Most characteristic tree of the drier parts of the district is Farash. This tree grows readily from cuttings and does not need much water. Shisham also which is well known for its timber, is grown near villages. Kikar, Reru, Siris, Neem, Dhak, Amaltas, Lasura, Sahtoot, Jumela etc are found grown along roadsides and canal banks. Other trees occasionally met with are Kachnar, Barna, Sohanjna, Kaim, Symbal, Lahura etc. Chhittar Thohar or Nagphani the common prickly cactus may be seen in wastelands and along hedges.

Among the fruit trees Aam and Jamun are the most important. In villages and around the village ponds, people have planted trees like Banyan or Barh, Peepal, Neem and Kaundu to

provide shade for the cattle. In dry areas, people plant such trees near villages on religious ground. Besides shade, these trees provide food for cattle in the shape of fodder during emergencies and fruits to the birds. The aquatic flora of the district includes such flowering plants as Singhara, Chhota Kamal etc. Most of the herbs and shrubs of the district possess medicinal properties.

Biggest and most conspicuous of the grasses is Munj or Sarkanda. A very good fodder is Dub. Other grasses commonly seen in the district are Khaskhas, Makhra or Madana etc. Bansa and Sambhalu are used as roofing material for mud houses. The grasses like Sanwak, Dub, Deila and Bathu are harmful for crops but provide good fodder for cattle.

Rapid increase in human population and extension of cultivation fields has led to disappearance of wild animals to a large extent. Now only a few neelgai (blue bull), antelopes and wild hares are found in the area. Neelgai and antelopes browse the young shoots and retard the growth of plants.

Wild cat, fox, jackal, wolf, hyena, wild pigs are very rare. Monkeys are found in the district who ravage the sugarcane crop whenever they get chance. The people are unwilling to kill them on religious grounds.

Various types of ducks and geese which visit jheels and ponds of the district in winter are Brahminy duck, common teal, pintail gadwall, Widgeon, Showeller, pochard, mallard, grey leg geese, bar-headed and large white-fronted geese, snipes, cranes, cootes, etc. Partridges, green pigeon, blue rock pigeons, peal fowl, common sandgrouse and other birds such as sparrow, crow, kite, vulture and dove are found in the district. Scorpions are not very common but snakes are poisonous varieties of snakes such as Cobra and Krait are found. Wild animals which were once in abundance in the district are fastly disappearing.

Minerals and mining:

The district falls in the Indo-Gangetic Plain region. The geological structure of the district is formed of alluvium rocks of Recent period containing deposits of clay, silt, sand and loose gravels. With the exception of a few small exposures of Alwar quartzite belonging to the Delhi group of rock formations, the district is almost entirely covered by alluvial deposits. Kankar occurs at a number of places in the district.

Saltpetre that appears as thin white encrustation on the surface of the earth is found in about 49 villages of the district. It is primarily used in the production of nitrates and potash. The best use of the refined product is in the manufacturing of gun powder, fireworks, and farm fertilizers. Potash is used in the manufacturing of soap, matches, explosives, glass and ceramic industry. Lime Kankar is found in vast areas of the district. Tabular and modular forms of lime kankar occur around Birohar and Kaliawas villages of the district which are used in making cement. Building stone is mainly available in Guriani and Bhuriawas mines in Jhajjar tahsil. Brick earth or ordinary clay suitable for manufacturing of bricks is available in plenty in all parts of the district.

Mining in Haryana State is lying closed since March, 2010 due to Environmental non-clearance.

Soil and Cropping Pattern :

Soils as classified by the National Bureau of Soil Survey and land use Planning (ICAR) Nagpur, the district has mainly Orthids-Fluvents and Orchrepts types of soils. North western parts of the district contain loamy (Bhangar and Nardak) soils whereas the southern part contains coarse loam (Dohar and Check note) type of soils.

The crops grown in the district can be divided into two main categories viz kharif and

rabi locally known as sawani and sadi. The former is the summer season harvest and the latter as the winter season harvest. Any crop which does not strictly fall within these two harvests is known as a zaid crop and its harvest is called the zaid kharif and zaid rabi. Toria (an oilseed) is cultivated as Zaid Kharif; vegetables, melon, tobacco and green fodder as zaid rabi.

Major Kharif crops of the district include paddy, jowar, bajra and sugarcane, minor kharif crops are cotton and pulses. Major rabi crops of the district reported are wheat, rapeseed and mustard seed while the minor ones are barley, gram and winter vegetables.

Land and land-use pattern:

In the year 2010-11, against a geographical area of 1834.00* square kilometres (includes 81.12 square kilometres of urban area); the area of the district according to village papers supplied by the revenue authorities is 1844.31 sq. kms (rural area only). This shows difference in two sets of areas arrived at by different methods of measurement adopted by two separate agencies. However, we will discuss here land-use as per village records. Of the total area of 184,431 hectares, 155,970 hectares is net sown area; 2,615 hectares is culturable waste (including gauchar and groves) and 425 hectares of area is not available for cultivation to which we may call barren and unculturable land. Net area sown in the district is 84.57 percent of total area.

Jhajjar tahsil has a rural area of 590.42 square kilometres whereas Bahadurgarh, Beri and Matenhail tahsils possess 471.81 square kilometres and 379.04 square kilometres and 403.04 square kilometres of rural area respectively.

Tenancy:

Tenancy system was the outcome of insecure days after the decay of Mughal Empire owing to conflict between two classes viz - the landlords and the tenants. Taking into consideration, the deteriorating state of agriculture and the cultivator, the Punjab Tenancy Act of 1887 was enacted providing the right of occupancy.

After Independence, the government decided to bring land reforms especially to carry out its policy of 'Land to tillers' in order to improve the condition of cultivators and increase agricultural production. Haryana State comprised areas which were earlier in Punjab or in Pepsu (Patiala and East Punjab States Union) and had two different sets of legislation applicable to the State which were as follows:

Punjab Laws

- (1) The East Punjab Utilisation of Lands Act, 1949
- (2) The Punjab Abolition of Ala Malikiyat and Talukdari Rights Act, 1952
- (3) The Punjab Occupancy Tenants Act, 1952
- (4) The Punjab Security of Land Tenures Act, 1953
- (5) The Punjab Bhudan Yojana Act, 1955

Pepsu Laws

- (1) The Pepsu Abolition of the Ala Malkiyat and Talukdari Rights Act, 1954
- (2) The Pepsu Occupancy Tenancy Act, 1952
- (3) The Pepsu Tenancy and Agricultural Lands Act, 1955 (4) The Pepsu Bhudan Yojana Act, 1955

After the merger of Pepsu with Punjab two more Acts, the Punjab Resumption of Jagirs

Act, 1957 and Punjab Village Common Lands (Regulation) Act, 1961 were enacted.

Under the East Punjab Utilisation of Lands Act, 1949, the government enforced the utilisation of every inch of available culturable land. Under this Act a notice to take over the land is served on every land owner who allows his land to remain uncultivated for 6 or more consecutive harvests and the land taken over is leased out to others for a term ranging 7 to 20 years, priority being given to Harijans.

Abolition of Ala Malikiyat and Talukdari Rights Acts of 1952 and 1954, the rights of ala malik in the land held by adna malik were abolished.

Occupancy Tenants Acts of 1952 and 1954 declared all occupancy tenants as the owners of the land. The Punjab Security of Land Tenures Act, 1953 and the Pepsu Tenancy and Agricultural Lands Act, 1955 contained provisions relating to ceiling on agricultural land holdings, utilization of surplus area and security for tenants against exploitation and ejection were in force in different parts of Haryana. Government was further empowered to utilise the surplus area of both land-owners and tenants for the resettlement of ejected tenants, landless labourers and small land-owners. All areas owned by a local owner above 30 standard acres and by a displaced person above 50 standard acres were considered as surplus area.

Haryana Ceiling on Land Holdings Act, 1972 was enacted as recommended by the Central Land Reforms Committee, which provided for the assessment of permissible area in relation to a family instead of an individual and reduced the permissible area limit to 7.25 hectares of land under assured irrigation capable of growing at least two crops in a year, 10.9 hectares of land under assured irrigation capable of growing at least one crop in a year or 21.8 hectares in respect of any other land including banjar and land under orchards.

Owners of land generally cultivate their land themselves known as khudkasht (self cultivation). Sometimes the land is leased to small/marginal/ landless farmers on theka (contract) or batai (Share-cropping). The normal rate of batai is one-third depending upon the provision of irrigation, fertilisers, seeds, etc. However, the rate of contract varies from time to time depending upon the quality of land and facility of irrigation system etc. Between the two, theka (contract farming) is more prevalent. As large number of farmers own modern machinery, they prefer to offer services for various types of agricultural operations against payment. This system is gaining popularity.

Average size of land holding during 1995-96 in Haryana is 2.1 hectares, which is relatively higher than the all India average of 1.6 hectares. 27.8 per cent of the land holdings were below 0.5 hectares, more than 50 per cent holdings were of the size between 0.5 and 3.00 hectares. Only 0.4 percent land holdings were of the size 20 hectares and above. 2.4 and 1.9 percent of the landholdings were respectively of the size of 5 to 7.5 hectares and 7.5 to 10 hectares.

In Haryana State, as per Agricultural Census 2010-11, the marginal operational land holdings were 48.4 per cent i.e. below one hectare, small land holdings were 19.4 per cent (1 to 2 hectares) semi-medium land holdings were 17.2 per cent (2 to 4 hectares), medium land holdings (4 to 10 hectares) were 12.1 per cent and the large holdings (10 to 20 hectares & above) numbering 45,978 were 2.9 per cent as per data supplied by the Director Land Records, Haryana. Average size of the land holding is 2.21.

At the time of Agriculture Census 1995-96 Jhajjar district formed part of the Rohtak district. Hence data is available for Rohtak district only.

In Rohtak district landholdings numbered 165,441, out of these 27.9 per cent (50,488) measured less than half hectare in size. 20.0 per cent of the landholdings were of

the size between half hectare and one hectare. Similarly 17.8 per cent were sized between one and two hectares. Average size of the operational land holding in the district was 1.8 hectares just below the State average of 2.1 hectares. As the size of the landholding increased, number of landholdings decreased inversely. In the size category of above 20 hectares, there were only 452 landholdings. Percentages varied between 22.4; 4.64 and 1.0 for size categories of 2-5; 5-10 and 10-20 hectares respectively.

Average size of operational landholding in the district was 2.1 hectares as per 2010-11 agricultural Census. Proportion of marginal landholding (less than 1 hectares) was 47.8 per cent, that of small sized landholdings (1-2 hectares) was 20.6 percent, semi -medium sized landholdings (2-4 hectares) were 16.4 percent, medium sized landholdings (4-10 hectares) contribution was 12.8 per cent and that of large sized landholdings (10 hectares & above) were merely 2.4 percent.

Agriculture :

During 2001, 51.2 per cent of main workers engaged in agricultural activities (cultivators and agricultural labourers) in the district whereas this percentage has been reduced to 42.9 per cent in 2011 Census. Proportions of marginal workers engaged in agricultural activities are still very high (64.3 per cent). However, tertiary activity is taking lead with passage of time as owing to the closure of Industrial units in National Capital, and spreading in NCR area.

The government is making all efforts to encourage agricultural production by distributing improved seeds, fertilizers, pesticides, providing latest developments in modern techniques, multiple cropping pattern techniques, increasing irrigation facilities, providing easy loans for modern agricultural machinery, etc.

RABI AND KHARIF CROPS IN JHAJJAR DISTRICT, 2008-09

Sr. No.	Crops	Area Sown	Production
Rabi			
1	Wheat	93,700	409,000
2	Gram	700	1,000
3	Rapeseed and Mustard Seeds	35,300	65,000
4	Potatoes (sweet)	1	N.A.
Kharif			
1	Paddy	33,900	33,000
2	Jowar	21,200	10,000
3	Barley	3,700	15,000
4	Bajra	27,300	44,000
5	Cotton American	600	3,000
6	Other Pulses	8,400	9,300
7	Ground Nut	100	200
8	Sugarcane	1,400	4,400
9	Other Vegetables	876	N.A.
10	Fresh Fruits	209	N.A.

Source: Statistical Abstract of Haryana, 2009-10

Major Kharif crops of the district are paddy, Jowar, bajra and sugarcane. Bajra and Jowar occupy 27,300 hectares and 21,200 hectares respectively, paddy 33,900 hectares and sugarcane 1,400 hectares of area during the year 2008-09. Other kharif crops of the district

are cotton and pulses. Though paddy is replacing jowar as major kharif crop gradually yet in area and production of jowar, Jhajjar is still top ranking district of the State. It is 7th ranking in area and production of Bajra among the districts of the State.

Major Rabi crops grown in the district are wheat in 93,700 hectares during 2008-09, gram in 700 hectares, Rapeseed and Mustard in 35,300 hectares of area during the corresponding period. Other Rabi crop is barley grown on 3,700 hectares of area.

Total foodgrains (cereals and pulses) were grown on 189,100 hectares of area giving a production of 521,400 tonnes. Rapeseed and Mustard is having an area of 35,300 hectares and production of 65,000 tonnes in the district. Area under cotton crop (American) was 600 hectares having a production of 3,000 bales (170 kg each).

Apart from cereals, pulses and cash crops, 1,086 hectares of area are under fruits and vegetables. 209 hectares of area is under fruits, 1 hectare under sweet potatoes, and 876 hectares under other vegetables.

Intensive use of agricultural machinery is observed in the district. 13,256 tractors, 8,933 combine harvesters, 26,927 tubewells and 17 sugarcane crushers were in use in the district during 2003.

Consumption of fertilizer has increased four times in the last thirty years in the State. In 1980-81, 2.3 lakh tonnes of fertilizer was consumed whereas in 2009-10, 13.6 lakh tonnes of fertilizer was consumed in the State.

Apart from compost, cattle dung and green manures, chemical fertilizers are being used increasingly. During 2009-10, chemical fertilizers (NPK) were used to the tune of 19,578 tonnes in the district. Out of this 14,089 tonnes was Nitrogenous (N), 5,143 tonnes Phosphatic (P) and 346 tonnes Potassic (K).

Irrigation :

Irrigation system in the district is through canals and tube-wells. The district forms part of the region that is liable to frequent draughts. The rainfall is seasonal and subject to variations. Such type of rainfall makes it necessary to have artificial irrigation.

During 2009-10, 79,000 hectares of area was irrigated through canals and 42,000 hectares through tube-wells. Irrigated area comes out to 74.2 per cent of the net area sown. Tank and well irrigation is almost going to be extinct. There were 22,288 diesel pumping sets and 7,024 electric pumping sets in the district during 2009-10 which tapped deeper layers of underground sweet water found in some sandy patches and near irrigation channels.

Pumping Lift Scheme is prevalent in areas at the tail end of Western Yamuna Canal system i.e. Kahnaur Distributary (Extension) and Sahlawas Lift Channel. Pumping Stations of low lifts have been provided to command these local areas.

Water channels that irrigate the district include Jhajjar Sub-Branch Dulehera Sub-Branch, Ismaila Distributary, Pai Distributary, Sahlawas Lift Channel and Rattanthal Distributary emanating from Delhi Branch of Western Yamuna Canal.

Animal husbandry:

The district possesses a meagre stock of 3.4 lakh which is 3.8 percent of the total stock of the State as per Livestock Census, 2007. With this proportion it is at 15th place among the districts of the State. On the other hand with one area of 1834.0 square kilometres which is 4.2 percent of the State area, it is 10th in ranking. There has been big decrease in

numbers in some categories in the last decade (1997-2007) like donkeys (-92.2percent), Camels (-88.7 percent), mules (-79.2 percent), horses and ponies (-71.6 percent), pigs (-59.1 percent) and goats (-35.0 percent) whereas the decrease in sheep (-1.2 percent) and Cattle (-8.3 percent) is not that much. Buffaloes number has recorded an increase of 54.7 percent and numbers of poultry birds have recorded more than double (229.1 percent) growth in the last decade.

LIVESTOCK AND POULTRY IN JHAJJAR DISTRICT, 2007

Category	Number of Animals		Percentage of State Stock
	Haryana	Jhajjar	
1	2	3	4
Cattle	1,552,361	40,001	2.58
Buffaloes	5,953,228	237,963	4.00
Horses & Ponies	25,834	597	2.31
Donkeys	4,838	297	6.14
Mules	10,600	500	4.72
Sheep	601,379	26,176	4.35
Goats	538,320	13,848	2.57
Camels	38,608	304	0.79
Pigs	133,521	6,056	4.54
Poultry Birds	28,785,497	140,207	0.49

Source : Statistical Abstract of Haryana, 2009-10

The decrease in number of various categories of animals is attributable to last mechanisation of agricultural activities and means of transport least use of animal power; decrease in grazing areas and changing life styles of people. Now farmer prefer crossbreed and quality milch animals. There were 7,379 indigenous milch cattle, 4,599 crossbreed cattle and 83,978 milch buffaloes which together formed 4.0 percent of the total milch cattles buffaloes stock of the State and formed 34.5 percent of the total cattle and buffaloes stock of the district, with this percentage, the district is 8th ranking district of the State. Though number of poultry birds have increased from 0.4 lakh in 1997 to 1.4 lakhs in 2007 but its state share remains the same i.e. half percent and the district is among the lowest ranking districts of the State.

During 2009-10 there were 323 Dairy and Milk Co-operative Societies which procured milk and milk products worth Rs. 1,820.1 lakhs and sold milk and milk products worth Rs. 1,905.1 lakhs.

Various measures to improve quality of cattle breed, artificial insemination work, control of contagious diseases among livestock, improvement of live stock and provision of Veterinary aid and provided by the Veterinary staff. During 2009-10 there were 65 Veterinary Surgeous and 204 Veterinary and Livestock Development Assistants functioning in the district.

To provide breeding facilities promptly and effectively to penetrate the benefits to interior rural areas, to implement piggery development programmes through supply of exotic breed at subsidised rates and training persons in raising poultry on scientific lines, there were 90 Govt. Veterinary Hospitals and 53 Govt. Veterinary Dispensaries in the district during 2009-10.

7 affiliated and Developed Gaushalas were operating in the district during 2009-10 to house stray, unproductive, old, infirm and useless cattle under religious sentiments. To give new meaning to the old concept of Gaushalas, some institutions have been converted into cattle breeding-cum-milk producing centres with some financial and technical assistance.

To ensure availability of hygienic and disease free meat for human consumption the district administration has allowed one recognised Slaughter House in the district during 2009-10 wherein 300 sheep, 100 goats and 100 pigs were slaughtered.

Sheep provides necessities of vital importance like meat for food, wool for clothing, skin for industrial enterprise and manure for agriculture. All the 5 Sheep Wool Extension Centres function in Jhajjar. Similarly, goat is also raised for milk and meat purposes and pig for meat only. Sheep, goat and pig breeding development work is looked after by the Veterinary institutions in the district. There were 26,176 sheep, 13,848 goats and 6,056 pigs which were 4.4 percent, 2.6 percent and 4.5 percent respective of their respective stock in the State as per Livestock census, 2007.

Fishery :

For generating employment, Fisheries Department brought 880 hectares of area stocked under fisheries in the district in the year 2009-10. 6075 tonnes of marketing fish was produced in the district which brought a total income of Rs 24.3 crores. Good quality of fish seed was supplied to fish farmers for fish production in tanks and other sources in the district. Fishing licenses were issued to 150 persons/private parties during 2009-10.

Industry :

Jhajjar district had been primarily an agricultural district. Village and cottage industries existed since ancient times which included leather tanning, handloom weaving, phulkari, utensil making, pottery, glass bangles, stone dressing, salt-making etc. Owing to one reason or the other, these have gradually become extinct. Partition of the country shattered the economic structure of the district. Emigration of Muslim craftsmen who were the backbone of Village industries brought the work to stand still. However, with joint efforts of the Govt. and migrants from Pakistan, speedy recovery was brought to the industry. The tempo of progress was accelerated by the State Government by rehabilitating displaced persons and establishing industrial area at Bahadurgarh, acquiring 103.7 acres and allotting 85 industrial plots on freehold basis and on easy terms. There was no possibility of starting any basic industry owing to lack of mineral resources in the district. Only kankar which formed the raw material for manufacture of cement was excavated at Kaliawas and Birohar in the district which was supplied to cement factory at Dadri. Development of large and medium scale industries became conspicuous in Third Five-year plan in the district which were concentrated mostly in Bahadurgarh town of the district. In the first two Five-year plans, small scale industries manufacturing agricultural implements and machine tools were steadily progressing. Several such units were set up at Bahadurgarh and Jhajjar in the vicinity of Delhi.

INDUSTRIAL PRODUCTION IN JHAJJAR DISTRICT, 2010-11

Sr. No.	Item	Production
1	Paper	6,377 metric tonnes
2	Cotton textiles	Rs. 34 lakhs
3	Sewing machines	353 (number)
4	Agricultural implements	Rs. 1,300 lakhs
5	Machine tools	Rs. 1,300 lakhs
6	Steel re-rolling	826 metric tonnes
7	Steel tubes	345,296 metric tonnes
8	Water fittings	Rs.50 lakhs
9	Scientific instruments	Rs.463 lakhs
10	Glass	Rs.2,258 lakhs
11	Hosiery	Rs.1,428 lakhs
12	Powerloom weaving	Rs.300 lakhs
13	Machine embroidery	Rs.2,000 lakhs
14	Sports	Rs.3,000 lakhs
15	Automobiles	Rs.600 (number)

Source: Statistical Abstract of Haryana, 2010-2011.

As per Statistical Abstract of Haryana 2012, there were 496 registered working factories in the district with an estimated number of 25,776 workers employed in 2010. Highest number of 77 registered working factories was found in non-metallic mineral products. Other major concentrations of industries were found in basic metal & alloys; rubber, plastics & petroleum products, food products; electrical machinery apparatus and appliances, Machinery & machine tools; chemical & chemical product; Cotton textile; textile products; paper & paper products; transport equipment & parts; wood & wood products; leather and leather products; etc. Areas of minor concentration were found in transport equipment & parts; other manufacturing industries; water works & supply; repair services, etc.

Industrial base of the district has been broadened in the last decade owing to pressure for industries ousted from National capital Delhi and establishment of I.T. hub in Gurgaon. Workforce in agricultural activities has decreased from 57.1 per cent in 2001 to 48.1 percent in 2011. Ratio of other workers has increased from 40.8 percent in 2001 to 49.0 percent in 2011 and female participation of Other Worker has increased from 25.7 percent to 38.0

percent.

LARGE & MEDIUM SCALE INDUSTRIAL UNITS IN JHAJJAR DISTRICT, 2010

(WITH INVESTMENT OF MORE THAN RS. 10 CRORES AND ABOVE)

Sr. No	Name of Unit	Year of Establishment	Product	Investment (in Rs. Crores)
1	2	3	4	5

Source: Director, Industries, Haryana, 2010

As per information supplied in 2010 on large and medium scale Industrial units by the Director Industries Haryana, there were 82 such units in the district out of these, 34 units were located either in Bahadurgarh town or surrounding rural areas of Bahadurgarh tahsil (32 urban, 2 rural), Out of remaining 2, 1 is set up in Jhajjar town and the other in village Khalilpur of Jhajjar tahsil. Both are socks (woven) manufacturing units. Though large and medium industrial units in the district manufacture a variety of items but the oldest and famous unit is M/s Hindustan Sanitaryware & Inds. Ltd. Bahadurgarh established in 1962-63, its present investment is of Rs 26.13 crores. Another unit of M/S Hindustan National Glass & Ind. Ltd Bahadurgarh produced quality glassware & tumblers were set up in 1964-65, its present investment is of Rs 39.72 crores. M/s SPL Ltd. Vill. Kassar Teh. Bhadurgarh, set up in 1972-73 manufacturing ceramic glazed tiles is the biggest industrial unit of the district in terms of investment. Present investment in this unit is Rs. 124.46 crores. M/s Surya Roshni Ltd. Bhadurgarh with an investment of Rs 20.74 crores produces steel pipes & tubes. M/s Hindustan Petroleum Corporation Ltd. Bahadurgarh had set up a bottling plant in 1993-94 which has a present investment of Rs 27.49 crores. M/s Parle Biscuits Ltd. (Sankhol) Bahadurgarh with investment of Rs 5 crores and M/s Relaxo Footwear Ltd. Bahadurgarh with investment of Rs. 6.5 crores are also reputed units. M/s Merino Panel Products Ltd. (Rohad) Tahsil. Bahadurgarh manufacturing decorative laminates was established in 1995-96 which has present investment of Rs 8.8 Crores. M/s Tirupati Ceramic Ltd. Bahadurgarh set up in 1995-96 producing fine bone china crockery has present investment of Rs 10.4 crores.

Trade and Commerce:

In the 19th century, trade was confined to movement of grains, cotton, raw sugar, ghee and hides to the nearby markets of Delhi and Meerut (U.P.) by small traders and agriculturists. These goods were carried mostly in large carts. Chief import was of cloth, tobacco, sugar, salt and hardware. Position was not much different in early 20th century. The nature and direction of trade have undergone change. It is no longer confined to Delhi and Meerut. With greater use of rail and road transport, traders have started sending their goods all over the country. The cattle of this area were in great demand as far away as Bombay and Calcutta.

In order to eliminate unhealthy market practices and to ensure fair prices to the farmers, regulated markets came up at Bahadurgarh (1941) and Sampla (1950) with sub-market yards at Jhajjar and Beri. Main arrivals in these markets during 1966-67 included wheat, gram, barley, cotton seed, oilseeds, gur, jowar, bajra, sarson etc.

During March, 2011, the following principal agricultural markets existed in the district :

1. Jhajjar
2. Bahadurgarh

Apart from these, there were three sub-yards. Average area served per regulated market in the district was 917 Sq. kms. whereas number of villages served per regulated market was 126. Usual course of trade in agricultural produce is conducted through wholesalers, retailers and commission agents or arhtias.

Total arrivals of agricultural produce during 2010-11 in these principal agricultural markets and sub-yards in the district were 1.2 lakh tonnes. Heaviest arrival was of wheat which accounted for 65,500 tonnes, paddy 200 tonnes gram arrival was 200 tonnes, maize 300 tonnes, bajra 5,400 tonnes, groundnuts 100 tonnes, potatoes 14,300 tonnes, pulses 300 tonnes, onions 1,900 tonnes, gur, shakkar, khandsari 500 tonnes, Oilseeds 1,700 tonnes, cotton seed 300 tonnes, vegetables and fruits 26,200 tonnes and other agricultural produce 1,600 tonnes.

Under the foodgrain procurement scheme during 2010-11 purchases were made by the following agencies in the district: Wheat (69,857 tonnes) – State Government (28,185 tonnes), F.C.I. (17,571 tonnes) Hafed (22,121 tonnes) and Haryana Warehousing Corporation (1980 tonnes). There were no cold stores in the district during 1998-99.

During 2001-02, thirteen export-oriented units were functioning in the district which earned Rs.108.9 Crores to the State Exchequer.

Total establishments/enterprises in the district as per Economic Census, 2005 were 24,469. Non-agricultural enterprises formed 96.6 per cent of the total establishments. Only 29.9 per cent of the total enterprises employed one or more hired workers. 88.5 per cent establishments were functioning under own premises whereas 2,822 establishments were without premises. 96.6 per cent of the enterprises functioned throughout the year whereas 838 enterprises were seasonal. Ownership of 94.1 per cent enterprises was in private hands. 62.0 per cent of the enterprises did not make use of power or fuel.

Employment in these enterprises was 92,969 persons of these 16,293 were females and 1,794 children. Hired workers numbered 65,668 which included 14,484 females and 1307 children.

During 19th century when the facilities of modern banking and co-operative credit were not available, money-lending was controlled by the sahuks in Towns and petty shopkeepers in Villages. They exploited the poor land-holders.

Institutional finance is a must for development of any area. It is available through both commercial and co-operative banks. In Jhajjar district there were 114 banking institutions including 30 co-operative banking institutions in March 2011. Bahadurgarh tahsil possessed 51 banks while Jhajjar tahsil had 41 banks and Beri tahsil possessed 13 banks including co-operative banks. Among the urban areas, Bahadurgarh Urban Agglomeration had major concentration of scheduled banks being the industrial Town and having close proximity to NCR.

Transport :

Transport and communication is the nervous system of economy of a particular area. Prior to 1870 only fair weather unmetalled roads served for the transport action of grain to the markets and until 1910 no railway or telegraph line touched the district. It was only in 1910 when Bathinda-Rewari Railway Line connected the district with other parts of the country. Jhajjar district is lagging behind in so far as the network of railways is concerned. Length of rail line in the district is very small, only about 25 kilometres. It was only after the creation of Haryana State in 1966, the government made a policy to bring every village on metalled road and a formal decision to link every village with metalled roads was taken in 1970. Now the district is sufficiently served by roads. All the towns and the villages are connected by metalled roads. The district has a good net work of passenger buses which have interlinked almost every village. State transport and private buses are available for all the big centres and towns after a short interval. There are two transport depots located at Jhajjar and Bahadurgarh.

National Highway-71 Jhajjar-Rewari-Bawal road passes through the centre of the district in north-south direction whereas N.H.-10 Maharaja Aggarsain Marg Delhi-Rohtak-Hisar-Fatehabad-Sirsa-Fazilka makes a short appearance in the north eastern part of the district passing through Bahadurgarh Town. The length of National Highways in the district during 2001-02 is 73 kilometres and that of State Highways as 869 kilometres. The district is just below the State average in terms of length of metalled roads per 100 sq. km. of area and per lakh of population. State highways traversing through the district include S.H.-15A Jhajjar-Farrukhnagar-Gurgaon road; S.H.-20 Murthal-Sonipat-Kharkhoda-Sampla-Jhajjar-Jahajgarh-Chhuchhakwas-Charkhi Dadri-Loharu Road; and S.H.-22 Bahadurgarh-Jhajjar-Kosli Road. Apart from the above roads major district roads as Jhajjar-Badli to Delhi Border; Bahadurgarh-Chhara-Dujana-Beri- Kalanaur and Chhuchhakwas-Jharli Bahu-Karoli, all make peep into the interior parts of the district. Two Broad Gauge Railway Lines just

make small appearance, one in the north-east corner running parallel to the N.H.-10, Delhi-Rohtak with railway stations at Bahadurgarh and Asauda Sewan and the other railway line in the south-west corner, Rewari-Bhiwani-Hisar-Sirsa-Bathinda with only railway station Jharli in the district.

Important focal points of the district include Ladrawn, Sankhol, Bahadurgarh, Dighal, Chhara, Beri, Jhajjar, Badli, Sahlawas, Matanhail and Dubaldhan. Transport statistics as supplied by the State Transport Commissioner Haryana, motor vehicles registered during 2010-11 in the district were 3,244 cars, 24 Jeeps, 1,712 Tractors 11,768 Motorcycles/Scooters/Autocycles 1,036 trucks, 136 taxis, 109 buses, 294 auto-rickshaws and 489 miscellaneous vehicles whereas motor vehicles on road were reported as 78,406 Autocycles/Scooters/Motorcycles, 2,385 Jeeps, 13,368 Private Motor Cars and 39,174 Tractors 4,262 auto-rickshaw, 770 taxis, 432 other public services vehicles and 18,655 goods vehicles, during the same period in the district.

Electricity and Power:

Power availability in the State has improved drastically over the last four decades which was 601 million KWH during 1966-67 and 27,224 million KWH during 2008-09. During 1966-67 per capita consumption were 48 units KWH which increased to 507 units per capita KWH during 2000-01 and 905 units per capita KWH during 2009-10. There were 47.9 lakh total electric connections in the State, out of which 36.8 lakh were domestic connections in 2010-11.

In Jhajjar district, all 247 inhabited villages make use of electricity for domestic purposes, agricultural purposes and other purposes as per information supplied by the revenue authorities in Village Directories during 2009-10.

Gram Panchayats, composition, jurisdiction and role in Development of Village and its economy

Village has been the basic unit of administration and instrument of development of Indian Society since ancient times, the institute of ‘**Panchayat**’ being an integral part of self governance at grass-root level. The term ‘Panchayati Raj’ refers to the process of governance at the lowest level i.e. Panchayat. There is a three tier system of governance in the State; ‘Gram Panchayat’ at the village level, ‘Panchayat Samiti’ at the Community Development Block level and ‘Zila Parishad’ at the district level.

Haryana state has been in front line by effecting the 73rd amendment in the constitution Act of Parliament, 1992 with a view to make Panchayati Raj institution, (PRI) especially the Gram Panchayats, a centre of decision making machinery at the local level and viable to plan, execute and monitor various projects of development at their own level in accordance with law. During 2008-09 state govt. launched four new schemes, namely, Mahatma Gandhi Granin basti yojana, special development works scheme, Mukhya Mantri Anusuehit jati Nirma besti yojana, Grant – in aid to Panchayats in lieu of abolition of house tax. An amount of Rs. 866.1 crore was allocated to development of Panchayats department, out of which 683.1 crore was made over and other bodies in the state as grants under various schemes like matching Grants Scheme, Revenue Earning Scheme, State Finance Commission Grants Scheme, Honorarium to village chowkidars and representatives of Panchayati Raj Institutions, Health and sanitation, Education, Rural Roads and communication schemes, constructions of Anusuehit jati/ Backward class/General class chaupals (subsidiary scheme), Total sanitation campaign, pavement of streets, etc. Besides states budgetary allocation, the PRIs were allocated Grants-in aid by Govt. of India as per recommendations of the Central

Finance Commission and annual lease money of village shamlat lands had been other major sources of income of the Gram Panchayats.

Haryana Panchayati Raj Act 1994, provides that the Government shall by election establish a **Gram Panchayat** by name in every **Sabha Area** constituted for any village or a part of village or group of contiguous villages with a population of not less than five hundred and Gram Panchayat shall consist of a Sarpanch elected by Gram Sabha form amongst its voters, by secret ballot and **Six to Twenty Panches** from wards in a Gram Panchayat area. Haryana Panchayati Raj Election Rules, 1994 further provide that the minimum number of seats/wards in a Gram Panchayat having population upto 500 shall be Six and for every additional five hundred population or fraction thereof one extra seat shall be provided subject to a maximum of Twenty seats.

The last general election of Panchayats in the State was held in March, 2005 under the provision of Haryana Panchayati Raj Act of 1961. Every Gram Panchayat, Panchayat Samiti and Zila Parishad have adequate seats reserved for Scheduled Castes and also for the women. The district has 249 Gram Panchayats, 5 Panchayat Samitis and the Zila Parishad.

It is obligatory on part of a Gram Panchayat to make adequate arrangements in the field of agriculture, animal husbandry, dairy milk, poultry, fisheries, social and farm forestry, minor forest produce, fuel, fodder, village and cottage industry, drinking water, rural electrification and non-conventional energy sources, poverty alleviation programme, education, adult and non formal education, public libraries, cultural activities, markets and fares, rural sanitation, public health and family welfare, women and child development, social welfare which also includes welfare of the handicapped and mentally retarded, welfare of the weaker sections, public distribution system, maintenance of community assets, construction and maintenance of Dharamshalas and similar institutions, cattle sheds, ponds, cart-stand/bus stop, regulation of manure pits in public places, etc. Panchayat Samitis are meant to oversee the activities being undertaken by Gram Panchayats and assist them in achieving their goals. At the district level, it is the Zila Parishad which coordinates and advises the government on the issues relating to developmental activities in the villages, allocation of work to Gram Panchayats and Panchayat Samitis and also approves the budget required for Panchayats and Panchayat Samitis in carrying out developmental programmes.

(ii) Census concepts :

Building: A 'Building' is generally a single structure on the ground. Usually a structure will have four walls and a roof. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Pucca houses: Houses, the walls and roof of which are made of permanent materials. The material of walls can be anyone from the following, namely, Stones (duly packed with lime or cement mortar), G.I/metal/asbestos sheets, Burnt bricks, Cement bricks, Concrete Roof may be made of from any one of the following materials, namely, Machine-made tiles, Cement tiles, Burnt bricks, Cement bricks, Stone, Slate, G.I/Metal/Asbestos sheets, Concrete. Such houses are treated as Pucca house.

Kutchra houses: Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary

materials, namely, grass, Unburnt bricks, bamboos, mud, grass, reeds, thatch, plastic /polythene, loosed packed stone, etc. Such houses are treated as Kutcha house.

Dwelling Room: A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non-residential purpose or both. If a building has a number of Flats or Blocks/Wings, which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, these are considered as a separate Census house.

Village: The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In un surveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area: The data in the census are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. The urban area comprises two types of towns viz; Statutory towns and Census towns. In the Census of India 2011, the definition of urban area adopted is as follows:

(a) Statutory Towns : All places with a municipality, corporation, cantonment board or notified town area committee, etc are known as statutory towns.

(b) Census towns: All other places satisfying the following three criteria simultaneously are treated as Census Towns.

i) A minimum population of 5,000;

ii) At least 75 percent of male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per sq. km. (1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 2001 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 percent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. In addition the above stated towns, urban areas also constitutes of OGs which are the parts of UAs.

Urban Agglomeration: An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together with or without urban outgrowths of such towns. In some cases, railway

colonies, university campuses, port areas, military camps etc; may come up near a statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may qualify to be clubbed with the existing town as their continuous urban spread (i.e., an Out Growth). Each such town together with its outgrowth(s) is treated as an integrated urban area and is designated as an 'urban agglomeration'. For the purpose of delineation of Urban Agglomerations during Census of India 2011, following criteria has been adopted:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of an Urban Agglomeration (i.e. all the constituents put together) should not be less than 20,000 as per the 2001 Census. In varying local conditions, there were similar other combinations which have been treated as urban agglomerations satisfying the basic condition of contiguity.

Out Growth (OG): The outgrowth is a viable unit such as a village or a hamlet or an enumeration block and clearly identifiable in terms of its boundaries and location. While determining the outgrowth of a town, it has been ensured that it possesses the urban features in terms of infrastructure and amenities such as pucca roads, electricity, taps, drainage system for disposal of waste water etc., educational institutions, post offices, medical facilities, banks etc and physically contiguous with the core town of the UA.

City: Towns with population of 100,000 and above are called cities.

Household: A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen/common cooking. There may be one member households, two member households or multi-member households.

Institutional Household: A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, observation homes, beggar's homes, jails, ashrams, old age homes, children homes, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2011, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household : Households who do not live in buildings or census houses but live in the open or roadside, pavements, in hump pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Language and Mother tongue: As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person. Mother tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate: A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate: Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational level: The highest level of education a person has completed.

Work: Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. The main point to note is that the activity should be economically productive. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker: A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker: A person who worked for 3 months or less but less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker: A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator: For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation of land owned or from government or from private persons or institutions for payment in money, kind or share. Cultivation also includes effective supervision or direction in cultivation. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the plantation crops like— tea, coffee, rubber, coconut and betel nuts (areca). The workers engaged in Plantation crops are recorded under "other workers".

Agricultural labourer: A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker: Household industry is defined as an industry conducted by one or more members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. The activity relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely

trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker: A person, who has been engaged in some economic activity during the last year of reference period but not as a cultivator or agricultural labourer or worker in Household Industry. The type of workers that come under this category include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In fact, all those workers other than cultivators or agricultural labourers or household industry workers are 'Other Workers'.

Work participation rate: Percentage of Workers (Main + Marginal) to total population.

Population density: Population density is the number of persons inhabited per square kilometer of the area.

Age: Age is measured in terms of the completed number of years.

Sex Ratio: Number of females per 1,000 males in a population.

(iii) Non-Census Concepts :

Civic status of urban units: Civic Status of a town/city is determined on the basis of Civic Administrative Authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of U.A./town: Size-class of U.A./Town is based on the population size of the U.A./City/Town.

U.A.s/Towns with 100,000 and above population is classified as Class I U.A.s/ Towns. Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000- 19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area: The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, faulty arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city : The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities and the same criteria of population have been adopted in 2011 census.

(iv) 2011 Census findings – Population, its distribution :

Jhajjar district having a population of 958,405 consists of 514,667 male population and 443,788 female population. Decadal growth rate of 8.9 per cent in the district during 2001-2011 period. It is the minimum in Haryana State.

The density of population in the district has gone up to 523 persons per square kilometer in 2011 as against 480 persons in 2001. As per Census 2011 in Haryana the rank

of density is 14th out of 21 districts of Haryana.

The literacy rate of the district is 80.6 per cent as compared to the State literacy rate of 75.6 per cent and it is ranking 6th among the districts of the State. The literacy rate is higher in urban area as compared to rural area. It is 84.3 per cent in urban area and 79.4 per cent in rural area. The male literacy rate (89.3) is also higher than that of female literacy rate (70.7). The gap between male and female literacy rate is of 18.6 points during 2011. In female literacy the district ranks at 7th position.

Out of a total population of 958,405 in the district, 715,066 persons live in rural area whereas 243,339 persons live in urban area. About 25.4 per cent of the total population of the district lives in urban area but accounts for 2.8 per cent of the total urban population of the state in 2011. The decadal growth of population in the district is 8.9 per cent during 2001-2011 and it is 4.4 per cent in rural area and 24.7 per cent in urban area.

Sex Ratio is defined as number of females per 1000 males. It is surprising that the sex ratio in all the districts of Haryana is below the National Average (943) in 2011 Census. For the State as a whole, the sex ratio was 867 in 1901, 871 in 1951, 865 in 1991, 861 in 2001 and 879 in 2011, but Jhajjar district has recorded sex ratio varying from 861 in 1991 to 847 in 2001 and 862 in 2011. As per Census 2011 the rank of Jhajjar District in respect of sex ratio is 610 out of 640 districts which speak of its poor performance on this front. If we talk about tahsil sex ratio in 2011, Beri tahsil possesses a sex ratio of 868, Bahadurgarh tahsil possesses a sex ratio of 848, Jhajjar tahsil possesses a sex ratio of 883 and it is 859 in Matenhail.

The strength of population in 0-6 age group in Jhajjar district has decreased to 120,051 in 2011 from 131,740 in 2001 and the proportion of population in 0-6 age group is 12.53 per cent in 2011. The child sex ratio of the district is 782 in 2011 as compared to 801 of 2001. The child sex ratio in Beri tahsil is 777 and 774 in Bahadurgarh tahsil. The child sex ratio in Jhajjar tahsil is 793 and 789 in Matenhail tahsil.

Population of the Scheduled castes has been reported as 170,448 persons in the district out of which 90,856 are males and 79,592 females. The percentage of Scheduled Castes population to total Population in the district is 17.8 per cent as compared to 20.2 per cent of the State.

In Jhajjar district total 326,534 persons have been reported as workers in 2011 out of which 253,833 persons reside in rural area and 72,701 persons reside in urban area. 25.72 per cent have been reported as main workers, 8.36 per cent have been reported as marginal workers and 65.93 per cent have been reported as non-workers. The Work Participation Rate (WPR) of the district is 34.1 per cent, the rural Work Participation Rate is 35.5 per cent and the urban Work Participation Rate is 29.9 per cent as per Census 2011 whereas the WPR as per 2001 Census was 44.2 per cent, the rural WPR was 47.3 per cent and the urban WPR was 33.1 per cent. Out of the total workers (Main & Marginal) 34.4 per cent have been reported as Cultivators, 13.7 per cent have been reported as Agricultural Labourers, 2.8 per cent have been reported as HHI workers and 49.0 per cent have been reported as Other Workers.

When we talk about Work Participation Rate at tahsil level, Beri tahsil possesses a WPR of 34.5 per cent, male WPR is 47.7 per cent and female WPR is 19.3 per cent. There is a gender gap in the WPR of 28.4 points in the tahsil which is noticeable. Bahadurgarh tahsil possesses a WPR of 33.3 per cent, male WPR is 49.2 per cent and female WPR is 14.6 per

cent. There is also a noticeable gender gap in the WPR of 34.6 points in this tahsil which is noticeable. Jhajjar tahsil possesses a WPR of 32.6 per cent, male WPR is 47.2 per cent and female WPR is 16.0 per cent. There is a gender gap in the WPR of 31.2 points in this tahsil. Matenhail tahsil possesses a WPR of 38.5 per cent, male WPR is 50.3 per cent and female WPR is 24.7 per cent. There is also a noticeable gender gap in the WPR of 25.6 points in this tahsil.

The house listing data of Census 2011 reveals that there are 290,144 census houses in the district out of which 257,813 are occupied and 32,331 are vacant. As such the proportion of vacant houses in Jhajjar district (11.1 per cent) is higher than that of the State (8.7 per cent) which is a cause of concern. Further, among the occupied census houses 71.0 per cent are under use for residential or partly residential purposes.

Separate Kitchen is available to 70.6 per cent of the households in this district. This percentage, being 7th highest in the State, is significantly higher than that of the State (66.5 per cent) and the country (61.3 per cent) too. 0.2 per cent of the households do not cook in the house.

The use of LPG as fuel for cooking in the district is 38.2 per cent which is significantly lower than that of the State (44.0 per cent) and India (28.6 per cent).

The use of electricity as the source of lighting is fairly high in all the districts in the State as such. In Jhajjar 91.9 per cent of the households use electricity as the main source of lighting in comparison to 90.5 per cent of the State and 67.3 per cent households in India.

Availability of bathroom and latrine within the household are critical indicators for measuring women's health status in society. Jhajjar district with 83.9 per cent of the households having separate bathroom is better placed than the State (82.5 per cent) and India (58.4 per cent) as such. Likewise, the percentage of households with no latrine in Jhajjar (32.6 per cent) is less than that of the State (31.4 per cent) and India (53.1 per cent). The position of Jhajjar district with regard to waste water out-let connected to drainage, closed or open, is encouraging. Only 6.7 per cent of the households in the district have no drainage for the waste water out-let in comparison to the State with 13.7 per cent and India with 48.9 per cent.

74.2 per cent of the households in Jhajjar district are availing banking services which is higher than that of the State (68.1 per cent) and India (58.7 per cent).

As regard availability of specified assets, Jhajjar district is one of the best equipped in the State. 69.8 per cent of the households in the district have the availability of television which is higher than that of the State (67.9 per cent) and India (47.2 per cent). Likewise, telephone is available to 79.1 per cent of the households which is again lower than that of the State (79.3 per cent) and India (63.2 per cent). Furthermore, in the district the availability of the computer to the household is 10.5 per cent in comparison to 13.2 per cent of the State and 9.5 per cent of India. Further, in Jhajjar district 28.8 per cent of the households possess Scooter/Motor Cycle/Moped. In terms of the luxury of car/jeep/van, in the district 7.8 per cent of the households have the availability of these assets in comparison to 10.5 per cent of the State and 4.7 per cent of India.

Interestingly, only 9.5 per cent of the households have reported none of the specified assets availability in comparison to 9.4 per cent of the State and 17.8 per cent of India.

(v) Brief analysis of PCA data based on insets tables 1 to 35

Table 1: Decadal change in population of Tahsils by residence, 2001-2011

Sl. No.	Tahsil	Population						Percentage decadal variation 2001-2011			Percentage urban population	
		2001			2011			Total	Rural	Urban	2001	2011
		Total	Rural	Urban	Total	Rural	Urban					
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Beri	147263	131101	16162	155791	139857	15934	5.79	6.68	-1.41	10.97	10.23

3	Jhajjar	248833	209831	39002	258595	208862	49733	3.92	-0.46	27.51	15.67	19.23
4	Matenhail	121752	121752	0	140273	140273	0	15.21	15.21	NA	0	0
District Total:		880072	684975	195097	958405	715066	243339	8.9	4.39	24.73	22.17	25.39

Table 1 provides tahsil wise decadal changes in population, by residence between 2001 and 2011. Decadal growth is 8.9 per cent in the district. Rural areas showed decadal growth of 4.39 per cent only while the urban areas touched to 24.73 per cent. Highest decadal growth is noted in newly created Matenhail tahsil (15.21 per cent) while the lowest in Jhajjar tahsil (3.92 per cent). Urban areas of Jhajjar tahsil are showing highest decadal growth of 27.51 per cent whereas among rural areas, Matenhail tahsil shows highest decadal growth (15.21 per cent). Decadal growth in urban areas is negative in Beri tahsil (-1.41 per cent) while corresponding lowest figure in rural area is also negative i.e. -0.46 per cent in Jhajjar tahsil. Percentage of urban population which was 22.17 per cent in 2001 has increased to 25.39 per cent in 2011. Highest proportion 44.01 per cent of urban population is observed in Bahadurgarh tahsil in 2011.

Table 2 depicts CD block wise number and percentage of inhabited villages in specified population size ranges. There are 247 inhabited villages in the district. Most of the villages (109) fall in the range of 2000-4999 followed by 82 villages in the range of 1000-1999 and 25 villages in the range of 5000-9999 among the C.D. blocks. 15 villages are in the 500-999 population range. There are only 4 villages falling in 10,000+ range of population. The remaining 12 villages are falling in the range of less than 500. Medium size of villages is the characteristic of the district.

Table 3: New towns, de-notified, declassified and merged town in 2011 census

(a)	New
	(i) Statutory town
	Nil
	(ii) Census town
	1.Faizabad(8055)
(b)	Denotified
	(i)Statutory towns of 2001 census denotified and also did not satisfy the criteria to be treated as census towns.
	Nil
	(ii)Statutory towns of 2001 census denotified but identified as census towns based on demographic and economic criteria.
	Nil
	(iii)Census towns of 2001 census are notified as statutory town in 2011 census.
	Nil
(c)	Declassified
	Nil
(d)	Wholly merged with other town(s).
	1.Sankhol,Merged in Bahadurgarh(7058)

*Declassified means the census towns of 2001 census which failed to satisfy the demographic and economic criteria.

Table 3 presents information about new towns (census or statutory), denotified, declassified and merged towns in 2011 Census. Sankhol CT is merged in Bahadurgarh MCL and Faizabad Census Towns is classified as new Census towns.

TABLE 4 : SEX RATIO OF STATE AND DISTRICT, 1901-2011						
Census year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	867	861	908	881	859	1017
1911	835	834	842	856	838	997
1921	844	848	811	852	839	940
1931	844	851	792	864	854	932
1941	869	879	806	915	909	952
1951	871	877	845	911	912	904
1961	868	874	842	902	900	920
1971	867	870	853	903	907	876
1981	870	876	849	891	894	871
1991	865	864	868	861	859	871
2001	861	866	847	847	854	823
2011	879	882	873	862	861	865

Note :- Sex ratio has been defined here as the number of females per 1000 males

Table 4 gives decade wise sex ratio in the district and the State from 1901 to 2011. Sex ratio of the district overall decreased from 881 to 862 as against the sex ratio of the State has increased from 867 to 879 for the period 1901 to 2011. As far as rural-urban break-up is concerned, sex ratio in urban areas of the district remained higher than 900 upto 1961 but below 900 since 1971 and it decreased to 823 in 2001 and further increased to 865 in 2011 in comparison to rural area. In rural areas sex ratio is much lower and remained at its lowest during 1911 (838).

Table 5: Sex ratio by Sub-district, 2011				
Sr.No.	Name of Sub-district	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	00407-Beri	868	868	861
2	00408-Bahadurgarh	848	840	860
3	00409-Jhajjar	883	882	888
4	00410-Matenhail	859	859	0
District: 083-Jhajjar		862	861	865

Table 5 shows sex ratio by tahsils. The district has sex ratio (862) lower than that of the State (879). It is 861 in rural areas and 865 in urban areas. Jhajjar tahsil has the highest sex ratio in rural 882 and urban 888 areas and Bahadurgarh tahsil has the lowest sex ratio in rural 840 and in urban areas 860.

Table 6: Sex ratio by CD Blocks, 2011		
Sr.No.	Name of CD block	Sex ratio
1	2	3
1	0083-Bond Kalan	0
2	0090-Beri	869
3	0091-Bahadur Garh	840
4	0092-Jhajjar	878
5	0093-Sahlawas	897
6	0094-Matenhail	846
7	0100-Nahar	904
Total		861

Table 6 explains the sex ratio by C. D. blocks. The rural sex ratio in the district is 861, which is on slightly lower as compared to urban areas (865) of the district. There is wide disparity in sex ratio of C.D. blocks of the district. As per 2011 Census, it varies between 840 (Bahadurgarh C.D. block) and 897 (Sahlawas C.D. block). Whereas Matenhail C.D. block is having 846, Beri C.D. block depicts 869, Jhajjar C.D. block is having 878 sex ratio. One village (Dharoli) of Nahar C.D. block (District Rewari) and one uninhabited village (Mankawas) of Bond Kalan C.D. block (District Bhiwani) fall in Jhajjar district.

Table 7: Sex ratio of rural population by ranges, 2011

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2011	Percentage distribution of population
1	2	3	4	5
Less than 700	3	1.21	7807	1.09
700 - 749	1	0.40	1693	0.24
750 - 799	7	2.83	16325	2.28

District: Jhajjar (083)	247	100	715066	100

Sex ratio District (Rural):861

Table 7 elaborates sex ratio of rural population by ranges. 113 villages in the district are having fairly high sex ratio in the range of 850-899. By contrast, 3 villages are having low sex ratio below 700. As many as 64 villages in the range of 700-849, out of 247 inhabited villages in the district and 66 villages have a sex ratio in the range of 900-999. Only one village is females outnumbered males in the range of 1000+.

Table 8: Sex ratio of towns, 2011

Sr.No.	Name of town	Urban status of town	Sex ratio
1	2	3	4
1	800417-Beri (MC)	(MC)	861
2	800418-Bahadurgarh (M Cl)	(M Cl)	862
3	061808-Ladrawan (CT)	(CT)	809
4	800419-Jhajjar (MC)	(MC)	886
5	061910-Faizabad (87) (CT)	(CT)	954
Sex ratio (Urban) district:			865

Table 8 depicts the sex ratio of towns. The district has urban sex ratio (865), which is slightly higher than the rural sex ratio (861) in the district. Town wise sex ratio is highest 954 in Faizabad (CT) and the lowest 809 in Ladrawan CT. The overall urban sex ratio in the district show similar trend. Jhajjar MC (886),Bahadurgarh (MCL) 862 and Beri MC (861) possess a sex ratio which is nearly equal to the District Urban sex ratio (865).

Table 9: Sex ratio of population in the age group 0-6 for Sub-district, 2011

Sr.No.	Name of Sub-district	Total/ Rural/ Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

District: 083-Jhajjar		Total	120051	67380	52671	782
		Rural	89704	50465	39239	778
		Urban	30347	16915	13432	794

Table 9 shows tahsil-wise sex ratio of population in the age group 0-6. The district child sex ratio 782 is lower than the sex ratio in the State (834). Contrary to the general trend, rural child sex ratio 778 in the district is lower than the urban 794 and this pattern is the same for Beri and Bahadurgarh tahsils. Among the tahsils, the rural child sex ratio in Jhajjar tahsil (794) is higher than that of Matenhail (789), Beri (776) and Bahadurgarh (756) tahsils. Urban child sex ratio is higher in Bahadurgarh tahsil (797) as compared to Beri (788) and Jhajjar (786) tahsils.

Table 10: Sex ratio of population in the age group 0-6 for CD Blocks, 2011

Sr.No.	Name of CD Block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females

Total		89704	50465	39239	778

Table 10 presents C.D. block wise sex ratio of population in the age group 0-6. Sahlawas C.D. block has the highest sex ratio (815) followed by Jhajjar (790) and Matenhail (780) C.D. block. The lowest sex ratio is found in Bahadurgarh C. D. block (756) followed by Beri C.D.block (772). Overall Sex ratio of the rural area is 778 which is at par with the rural sex ratio (778) of the State in 0-6 age group. One village (Dharoli) of Nahar C.D. block (District Rewari) and one uninhabited village (Mankawas) of Bond Kalan C.D. block (District Bhiwani) fall in Jhajjar district.

Table 11: Sex ratio of rural population in the age group 0-6 by ranges, 2011

Sex ratio District (Rural):778

Table 11 depicts sex ratio of rural population in the age group 0-6 by ranges. 44 villages have a sex ratio of less than 700 and they constitute 13.56 per cent of the rural population of the district while 110 villages have a sex ratio varying between 700-799 constituting 52.72 per cent of the rural population of the district. On the other hand, 62 villages have a sex ratio varying between 800-899 constituting 25.81 per cent of the rural population. As many as 19 villages have a high sex ratio varying between 900-999. Females out-numbered males in 12 villages.

Table 12: Sex ratio of population in the age group 0-6 of towns, 2011

District (Urban): 083-Jhajjar			30347	16915	13432	794

Table 12 deals with town wise sex ratio of population in age group 0-6. The child sex ratio in the urban areas of the district is 794. Faizabad CT has the highest child sex ratio (1021) and Jhajjar MC has the lowest sex ratio (779) followed by Beri M.C. (788). Bahadurgarh M.Cl (797) and Ladrawan CT (797) have urban child sex ratio higher than that of the district average 794.

		Urban	243339	39535	0	16.25	0

Table 13 shows tahsil wise number and percentage of Scheduled Castes and Scheduled Tribes population. There is no population notified as Scheduled Tribes in the district. Out of total population of 958,405 persons in the district, 17.78 per cent belong to Scheduled Castes. Rural and urban Scheduled Castes population in the district is 18.31 per cent and 16.25 per cent respectively. Among the tahsils, the highest proportion of Scheduled Castes population (20.58 per cent) is in Matenhail tahsil followed by Beri tahsil (19.28 per cent), Jhajjar tahsil (17.67 per cent) and the lowest 16.31 per cent is in Bahadurgarh tahsil.

Table 14: Number and percentage of scheduled castes and scheduled tribes (rural) population in CD Blocks, 2011

Table 14 presents C.D. Block-wise number and percentage of Scheduled Castes and Scheduled Tribes. There is no population notified as Scheduled Tribes in the State. Out of a total population of 715,066 persons in the rural areas of the district, 18.31 per cent belong to Scheduled Castes. Among the C.D. blocks, the highest proportion of Scheduled Castes (20.71 per cent) has been recorded in Matenhail C.D. block followed by Jhajjar C.D. block (19.37 per cent). The lowest percentage (16.24 per cent) of Scheduled Castes population is found in Bahadurgarh C.D. block followed by Sahlawas C.D. block (17.68 per cent) and Beri C.D. block (18.83 per cent).

Table 15: Proportion of scheduled castes population to total population in villages, 2011

District (Urban) : 083-Jhajjar		243339	39535	0	16.25	0

Table 17 shows town-wise number and percentage of Scheduled Castes and Scheduled Tribes population. It is evident from the table that 16.25 per cent population in urban areas of the district belongs to Scheduled Castes. The highest percentage (17.18 per cent) has been recorded in Jhajjar MC and the lowest (11.08 per cent) in Ladrawan CT. In Bahadurgarh MCL and Beri MC respectively 16.61 per cent and 12.11 per cent of the population belongs to Scheduled Caste. If compared in absolute figures, maximum number of Scheduled Castes population resides in Bahadurgarh MCL (28,366) and minimum (154) in Faizabad Census Town.

Table 18: Sex ratio among scheduled castes and scheduled tribes (rural) in CD Blocks, 2011

Sr.No.	Name of C.D.block	Scheduled castes sex ratio	Scheduled tribes sex ratio
1	2	3	4
1	0083-Bond Kalan	0	0
2	0090-Beri	878	0
3	0091-Bahadur Garh	856	0
4	0092-Jhajjar	890	0
5	0093-Sahlawas	882	0
6	0094-Matenhail	866	0
7	0100-Nahar	820	0
Total		873	0

Table 18 shows C.D. block-wise sex ratio among Scheduled Castes and Scheduled Tribes. There is no population notified as Scheduled Tribes in the State. Sex ratio among rural Scheduled Castes is 873, higher than general rural sex ratio of the district (861). Jhajjar C.D. block (890) has the highest sex ratio, followed by Sahlawas C.D. block (882) and Beri C.D.block(878), while the lowest sex ratio is found in Bahadurgarh C. D. block (856) followed by Matenhail C.D. block 866. Nahar C.D. Block (P) with 1 village has a sex ratio 820.

Table 19: Sex ratio among scheduled castes and scheduled tribes in towns, 2011

Sr.No.	Name of town	Scheduled castes sex ratio	Scheduled tribes sex ratio

5	061910-Faizabad (87) (CT)	1026	0
District (Urban): 083-Jhajjar		886	0

Table 19 shows town-wise sex ratio among Scheduled Castes and Scheduled Tribes. There is no population notified as Scheduled Tribes in the State. Urban Scheduled Castes population in the district exhibits better sex ratio (886) than the sex ratio (873) in rural areas. As against 886 for the district in urban population, the sex ratio of Scheduled Castes population varies between 817 and 1026 among towns. It is comparatively high in Faizabad CT (1026) and Jhajjar M.C. (916). In Bahadurgarh Scheduled Castes Sex ratio is 881 which is slightly lower than the sex ratio of the district (886). The lowest sex ratio is noted in Ladrawan CT (817) followed by Beri M.C. (858).

Table 20 details number and percentage of literates by tahsils. 80.65 per cent of the population in the district is literate comprising 89.31 per cent male literates and 70.73 per cent female literates. The highest literacy rate in the district is recorded in Bahadurgarh tahsil (82.84 per cent) and the lowest in Matenhail tahsil (76.83 per cent). Literacy rate in urban areas of the tahsils varies between 80.87 per cent and 84.68 per cent. Male literacy is higher than female literacy at all levels i.e. rural and urban. Male-female literacy gap in the district is 18.58 per cent which is lower in urban areas (13.00 per cent). This gap is the lowest in Bahadurgarh tahsil (15.63 per cent) showing impact of nearness to National capital and urbanization.

Table 21 presents C.D. block-wise number and percentage of literates by sex. Rural areas of the district have a literacy rate of 79.39 per cent (88.94 per cent males and 68.46 per cent females). Bahadurgarh C.D. block exhibits the highest percentage of literates (81.41 per cent) and Matenhail C.D. block exhibits the lowest percentage of literates (76.91 per cent). Sex differential in literacy are quite conspicuous in the rural areas of the district. Male literacy rate is the highest in Bahadurgarh C.D. block (89.84 per cent) and the lowest is in Nahar C.D. block (86.95 per cent). Female literacy rate is the highest in Bahadurgarh C.D. block (71.51 per cent) and the lowest in Nahar C.D. block (64.57 per cent) followed by Sahlawas (65.81 per cent), Beri (67.37 per cent) and Jhajjar (68.77 per cent) C.D. blocks. Male female literacy gap is the highest in Sahlawas C.D. block (22.27 per cent) and the lowest in Bahadurgarh C.D. block (18.33 per cent).

Literacy rate for District:	79.39			

Table 22 shows distribution of villages by literacy rate ranges in the district. In general, the district has relatively high literacy rate. Out of 247 inhabited villages no village has attained universal literacy, 105 villages fall in the literacy range of 81-90 per cent and another 135 villages have literacy rate varying between 71-80. This is to say that 97.17 per cent of the villages have a literacy rate exceeding 70 per cent. By contrast, low literacy rate (less than 50 per cent) is the characteristic of only one village. Remaining 6 villages fall in the range of 61-70 literacy rates.

Table 23 presents town-wise number and percentage of literates by sex. 84.34 per cent of the urban population are literate in the district. Faizabad CT (87.49 per cent) is marked with the highest literacy rate among the towns. On the other hand, Ladrawan CT has a literacy rate (70.06 per cent) which is the lowest in the district. Overall trend shows that in the remaining towns there is not much variation in literacy rate. Male Female differentials in urban literacy are narrower (13.0 per cent) than those of rural areas (20.8 per cent) in the district. 90.41 per cent males and 77.41 per cent females of urban areas are literate. Male Literacy rate varies between 76.97 per cent (Ladrawan CT) and 95.31 per cent (Faizabad CT). Likewise, in female literacy rate Faizabad CT (79.19 per cent) and Ladrawan CT (61.55 per cent) are having the highest and the lowest values respectively. Male- Female Literacy gap is the maximum in Beri town (18.89 per cent) and minimum in Bahadurgarh M.CI. (12.16 per cent).

Table 24 exhibits C.D. block-wise number and percentage of Scheduled Castes literates by sex. 73.51 per cent of the rural Scheduled Castes population is literate in the district. Jhajjar C.D. block (74.77 per cent) is marked with the highest literacy rate among the C.D. blocks. On the other hand Beri C.D. block has the lowest literacy rate of 71.86 per cent. There is not much variation in literacy rates among the C.D. blocks. 83.57 per cent males and 62.05 per cent females of rural area are literate. Male Literacy rates vary from 82.16 per cent (Matenhail C.D. block) to 85.29 per cent (Jhajjar C.D. block). Male-Female literacy gap is quite wider (21.52 per cent) in the district. This gap is the highest in Sahlawas C.D. Block (22.61 per cent) and lowest in Bahadurgarh C.D. block (20.02 per cent).

District Scheduled castes Literacy rate:	73.51			

Table 25 deals with distribution of villages by literacy ranges for Scheduled Castes population in the district. In the district, 242 (out of 247 inhabited) villages have Scheduled Castes population. Majority of the villages (162) have Scheduled Castes literacy between 71-80 per cent and another 45 villages fall in the range 61-70 per cent. In other words, 85.54 per cent of the villages which contain 91.82 per cent of Scheduled Castes population have a literacy rate in the range of 61-80. Furthermore, 31 villages which constitute 12.81 per cent of the total villages and 7.10 per cent of the Scheduled Castes population have a high literacy rate in the range of 81-90 per cent. There is no village in the district which exhibits 91 per cent and above literacy rate of Scheduled Castes.

Table 30 shows tahsil-wise number and percentage of main workers, marginal workers and non-workers by sex. In the district as such almost one third persons (34.07 per cent) in the district is recorded as worker either main or marginal. The proportion of male workers (48.58 per cent) in the district is still higher than that of females (17.24 per cent). The work participation rate in Jhajjar and Bahadurgarh tahsils is almost similar i.e. 32.58 per cent and 33.32 per cent respectively whereas work participation rate in Beri tahsil and Matanhail tahsil are 34.50 per cent and 38.49 per cent respectively. Male workers participation is highest in Matanhail tahsil (50.30 per cent) and female work participation is also highest in Matanhail tahsil (24.73 per cent) as compared to other tahsils. 65.93 per cent persons have been reported as non workers; the incidence of non-workers among females (82.76 per cent) is more than that of males (51.42 per cent). Female non-workers are the highest in Bahadurgarh tahsil (85.35 per cent).

Table 31 details C.D.block-wise number and percentage of main workers, marginal workers and non-workers. 35.5 per cent of the rural population is recorded as worker (25.55 per cent as main workers and 9.95 per cent as marginal workers). The percentage of workers is the highest in Matanhail C.D. block (38.20 per cent) and the lowest in Jhajjar C.D.block (32.91 per cent). Percentage of female workers is in the ranges between 15.99 per cent (Jhajjar C.D. block) and 23.45 per cent (Sahlawas C.D. block). Female non workers in the district are fairly high (80.30 per cent).

Table 32 furnishes town-wise number and percentage of main workers, marginal workers and non-workers by sex. 29.88 per cent of the urban population of the district is recorded as workers (main workers 26.21 per cent and marginal workers 3.67 per cent). Ladrawan CT (38.09 per cent) has the highest percentage of total workers in the district. Other towns do not exhibit much disparity in this regard. Beri M.C. (28.79 per cent), Bahadurgarh M CI (29.87 per cent), Faizabad CT (20.24 per cent) and Jhajjar M.C. (29.34 per cent) have total workers proportions nearer to the district average (29.88 per cent). Male-female differentials in participation rates are however, quite striking; male participation rate in urban area (47.04 per cent) is almost five times that of the female (10.04 per cent). All the towns reveal significant variation in the work participation rates of the two sexes. This gap is the highest (38.32 per cent) in Bahadurgarh M.CI where the female work participation rate is only 9.29 per cent. Female non-workers (89.96 per cent) are quite higher than male non-workers (52.96 per cent). Even they are still higher in Bahadurgarh M.CI (90.71 per cent) but female non-workers are the lowest in Ladrawan census town (78.82 per cent).

Table 33 exhibits tahsil-wise distribution of workers by sex in four categories of economic activity. Out of total workers (34.07 per cent of the total population) in the district, 34.42 per cent are cultivators, 13.73 per cent are agricultural labourers, 2.83 per cent are engaged in household industry and 49.01 per cent are recorded as other workers. This signifies that in this district 48.15 per cent of the working force is engaged in agricultural activities. 51.84 per cent of the work force is engaged in secondary or tertiary activities. Participation rate of females in the agricultural sector either as cultivator or as agricultural labourer is significantly high in the district as 58.5 per cent females are engaged in this activity. 41.49 per cent female workers are engaged in non- agricultural sector i.e. household industry and other work. The highest ratio of female workers engaged in agricultural sector is found in Beri tahsil (71.53 per cent) followed by Matenhail tahsil (70.15 per cent) and the lowest in Bahadurgarh tahsil (39.24 per cent). Even proportion of male workers engaged in agricultural pursuits is higher in Beri (60.6 per cent) and Matenhail (57.92 per cent) tahsils. Proportion of male workers engaged in tertiary activities is the highest in Bahadurgarh tahsil (68.55 per cent).

Table 34 depicts C.D. block-wise distribution of workers by sex in four major categories of economic activity. Out of total workers (35.5 per cent of the total population) in rural areas of the district, 42.88 per cent are cultivators, 16.37 per cent are agricultural labourers, 2.67 per cent are engaged in household industry and 38.09 per cent are recorded as other workers. This signifies that the district is primarily agricultural in character as 59.25 per cent of the working force is engaged in agricultural sector. It is only 40.76 per cent of the work force which is engaged in non-agricultural activities. Almost all the C.D. blocks have ratio of workers between 48.94 per cent (Bahadurgarh C.D. block) to 66.93 per cent (Sahlawas C.D. block) in agricultural sector. The participation of females in the agricultural sector either as cultivator or agricultural labourer is higher in comparison to males. In the district, 66.76 per cent of the female workers are engaged in agricultural activities. Only 33.24 per cent female workers are engaged in secondary and tertiary activities. Female workers engaged in agricultural pursuits are the highest in Beri C.D. block (73.73 per cent). Ratio of workers engaged in tertiary sector is the highest in Bahadurgarh C.D. block (51.06 per cent).

		Females	112891	11338	721	6.36	533	4.70	425	3.75	9659	85.19

Table 35 reveals town-wise distribution of workers by sex in four categories of economic activity. One third (29.88 per cent) of the urban population is recorded as total workers in the district, while 47.04 per cent males and 10.04 per cent females are recorded either main or marginal workers. As expected the urban workers are predominantly engaged in non-agricultural activities. It is only 9.11 per cent male workers who are engaged in agricultural sector. The trend is same in all the towns of the district but in Faizabad CT they are 68.33 per cent and in Bahadurgarh MC1 4.45 per cent only. 11.06 per cent female workers of the district are engaged in agricultural sector. A very big share of workers is engaged in tertiary activities in Bahadurgarh MC1 (95.53 per cent).

** Telephone includes Telephone,PCO and Mobile.

Table 36 shows C.D. block-wise distribution of villages according to availability of different amenities. Big proportions of amenities such as education (96.36 per cent), improved drinking water and transport and communications (100 per cent), approach by pucca road (90.69 per cent) and power supply (100 per cent) are available in villages of the district. In the district, Medical amenity is available in 74.49 per cent villages but Beri C.D.block (88.24 per cent) has quite good position followed by Bahadurgarh C.D.block (81.67 per cent). Postal and telephone amenities are available in 58.3 per cent and 100 per cent villages respectively. Again Beri and Bahadurgarh C.D. blocks have better shares of these amenities (61.76 per cent and 68.33 per cent for postal and 100 per cent for telephone amenity respectively). Banking and agricultural credit societies amenities are very poorly represented in the district with 16.6 per cent and 22.67 per cent villages respectively having these amenities.

Table 37 presents C.D. block-wise number and percentage of rural population served by different amenities. Educational (99.39 per cent), medical (89.21 per cent), improved drinking water (100 per cent), postal (77.53 per cent), transport and communicational (100 per cent), approach by pucca road (92.12 per cent) and power supply (100 per cent) amenities serve to very large proportions of population in the district. Telephone amenity serves cent per cent population of the district. Banking and agricultural credit society's amenities serve 29.68 per cent and 37.82 per cent population respectively in the district. In Jhajjar C.D. block only 22.43 per cent population is served by banking amenity and agricultural credit societies serve merely 27.12 per cent population in Sahlawas C.D. block.

Table 38: Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available, 2011

Bus includes private and public

Table 38 gives distribution of villages not having certain amenities arranged by distance range from the places where these are available in the district during Census 2011. 9 villages in the district do not have primary school amenity and the same is available at a distance of within 5 kilometres for 6 villages and 5-10Km for 3 villages. 50 villages are not having middle school amenity, in 37 villages the same is available within 5 kilometres, and 13 villages have at a distance of 5-10 kilometres. Amenity of Degree College is not available in 237 villages and the same is available within a distance of 5 kilometres in 29 villages, at a distance of 5-10 kilometres in 83 villages and at a distance of more than 10 kilometres in 125 villages. There is no hospital in 244 villages in the district and the same is available within a distance of 5 kilometres in 33 villages, 5 -10 kilometres in 91 villages and at a distance of more than 10 kilometres in case of 120 villages in the district. Out of 224 villages which do not have PHC available to them within the village, the same is available within 5 kms in 68 villages, at a distance of 5-10 kms in 108 villages and at a distance of more than 10 kms in 48 villages. 103 villages do not have postal amenity and the same is available at a distance of less than 5 kms. 216 villages do not have the amenity of commercial bank within the village, 223 villages do not have co-operative bank amenity and 191 villages do not have agricultural credit society within the village.

Table 39: Distribution of villages according to the distance from the nearest statutory town and availability of different amenities, 2011

Distance Range from the nearest Statutory Town (In Kilometres)	Number\ Percentage	Number of Inhabited Villages in Each Range	Type of amenity available							
			Education *	Medical ^	Post Office #	Telephone **	Transport Communications \$	Banks @	Agricultural Credit Societies	Approach by Pucca Road

\$ Transport communication includes bus service, railway facility and navigable waterways.

@ Bank includes Commercial Bank and Cooperative Bank.

** Telephone includes Telephone, PCO and Mobile.

Table 40 shows the distribution of villages according to population ranges and amenities available. Out of a total 247 inhabited villages in the district, 224 villages are approachable by pucca road, 100 per cent villages have power supply amenity, 100 per cent villages have improved drinking water, 96.36 per cent have educational amenity, 100 per cent have telephone and transport communication amenity in them, 74.49 per cent villages in the district enjoy medical amenity, 58.3 per cent have postal amenity, whereas only 16.6 per cent villages have banking amenity in them. Only 4 villages with population 10,000+ have all the amenities in them barring bank and agricultural credit amenity. All the villages possess the amenity of power supply. Highest number of villages (109) fall in the population range of 2,000-4,999 and all of these have improved drinking water amenity as well as transport communication, only 21 have banking amenity and 103 have medical amenity. An overall picture by the data shows a grim situation as regards banking and agricultural credit societies amenities. Smaller villages in the population range of less than 500, 12 villages do not have a good number of medical, banking and agricultural credit society amenities.

Table 41: Distribution of villages according to land use, 2011

Sr.No.	Name of CD Block	Number of inhabited villages	Total area (in Hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	0090-Beri	34	30413.00	84.42	62.08
2	0091-Bahadur Garh	60	46107.00	82.44	81.09
3	0092-Jhajjar	72	48368.00	86.69	84.39
4	0093-Sahlawas	37	20066.00	85.23	87.28
5	0094-Matenhail	43	34468.00	83.96	87.40
6	0100-Nahar	1	385.00	83.64	100.00
Total		247	179807.00	84.52	80.73

Note:- Culativable area= irrigated area + unirrigated area

Table 41 presents C.D. block-wise distribution of villages according to land use during 2011 Census. 247 inhabited villages of the district have 179,807 hectares of area out of which 84.52 per cent area is cultivable and 80.73 per cent of the cultivable area is irrigated in the district. Jhajjar C.D. block (86.69 per cent) has the highest percentage of cultivable area followed by Salhawas C.D. block (85.23 per cent) and Beri C.D. block (84.42 per cent). The lowest percentage of cultivable area is in Bahadurgarh C.D. block (82.44 per cent) followed by Matenhail C.D. block (83.96 per cent). Matenhail C.D. block (87.40 per cent) has the highest ratio of irrigated area closely followed by Sahlawas C.D. block (87.28 per cent) while the lowest ratio is found in Beri C.D. block (62.08 per cent).

Table 42: Schools/ colleges per 10,000 population in towns, 2011

Sr. No.	Name of the town	Type of educational institution (Approx. numbers)				
		Primary	Middle	Secondary / matriculation	Senior secondary	College*
1	2	3	4	5	6	7
1	800417-Beri (MC)	4	3	3	2	0
2	800418-Bahadurgarh (M CI)	3	2	2	1	0
3	061808-Ladrawan (CT)	6	6	6	7	0
4	800419-Jhajjar (MC)	8	6	4	2	0
5	061910-Faizabad (87) (CT)	8	0	0	0	0
District: Jhajjar (083)		4	3	3	1	0

Note- * College includes

Arts/ Science/ Commerce College (Degree Level and above)

Table 42 shows number of schools/colleges per 10,000 population in statutory towns of the district in 2011 Census. Urban areas of the district have 4 primary, 3 middle, 3 secondary/matriculation, 1 senior secondary schools per 10,000 of population.

Table 43: Number of beds in medical institutions in towns, 2011

Sr. No.	Name of the town	Number of beds in medical institutions per 10,000 population (Approx. numbers)
1	2	3
1	800417-Beri (MC)	9
2	800418-Bahadurgarh (M Cl)	2
3	061808-Ladrawan (CT)	0
4	800419-Jhajjar (MC)	21
5	061910-Faizabad (87) (CT)	0
District: Jhajjar (083)		6

Table 43 shows the number of beds in medical institutions per 10,000 population in each town of the district. Jhajjar M.C. has the highest number of beds (21) and the Bahadurgarh M.Cl have lowest number of beds (2 beds) per 10,000 population in medical institutions of the district. Faizabad CT and Ladrawan CT have no beds in medical institutions. Beri M.C. has 9 beds per 10,000 of population in medical institutions. Overall the urban area of district has 5 beds per 10,000 population in medical institutions.

Table 44: Proportion of slum population in towns, 2011

Sr.No.	Name of the town having slum	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	800418-Bahadurgarh (M Cl)	170767	63930	37.44
2	800419-Jhajjar (MC)	48424	11948	24.67
Total		219191	75878	34.62

Table 44 shows proportion of slum population in towns of the district. There are only two towns, namely, Bahadurgarh M.Cl and Jhajjar MC in the district reporting slums which has a 34.62 per cent as slum population.

Table 45: Most important commodity manufactured in towns, 2011

Sr. No.	Name of the town	Name of three most important commodities manufactured
1	2	3
1	800417-Beri (MC)	Agri Tools, Agri Tools, Desi Jutti
2	800418-Bahadurgarh (M Cl)	Agri Tools, Foot Wears, Sanitary Goods
3	061808-Ladrawan (CT)	Agri Tools, Brick Klin
4	800419-Jhajjar (MC)	Agri Tools, Milk Product
5	061910-Faizabad (87) (CT)	Agri Tools

Table 45 furnishes the most important commodities exported out of and manufactured in the towns of the district. As the district is primarily agricultural, few industries exist in the district. Wheat, Rice and Sulphur is exported from Beri town whereas Cement goods and Agricultural implements are being manufactured. Electric goods, Iron

pipes and Biscuits are exported from Bahadurgarh tahsil where these items are manufactured also. Jhajjar town exports Earthen pots like; Surahi, Desi Jutti and Katha etc. In Bahadurgarh M.C.I. tiles, sanitary goods and footwear are manufactured and tiles, sanitary wares and brass building hardware are exported. Ladrawan C.T. manufactures items of local use like earthen pots.

(vii) Major Social and Cultural Events

Some of the principal Hindu festivals like Holi, Janam Ashtmi, Dussehra, Diwali and others like Shivaratri, Ram Naomi, Solono (Raksha Bandhan) and Bhai Duj are observed by the Hindus here as in other parts of the country. There are other festivals, however, which are only of local importance and require a detailed description.

People in rural areas celebrate Holi somewhat differently. For many days before the festival, married women play Holi with men by throwing coloured water on them. This resembles what happens traditionally at Barsana, in Mathura. On Dhulendi (Phag), the day following Holi, the men folk take their turn and throw water on the women who reply by beating the men with sticks or *Kolras* (twisted cloth strips). The men act as if they are powerless, and their inability to defend themselves leads to much fun and frolic.

On the occasion of Janam Ashtmi people take out Lord Krishna's image in dolas and decorated palanquins in a festival locally called Jal Jholni. While the burning of effigies at the end of Dussehra is not customary in rural areas, the Village girls observe Sanjhi for a period of 10 days. They move out at night with earthen pots on their heads. These pots have holes all around and are lighted with diyas (earthen lamps) placed in them. This presents a lovely sight. The boys try to break the earthen pots which the girls protect. On the Dussehra evening these earthen pots with lighted diyas inside are floated in ponds. The lighted diya symbolises Sita (purity) while the boys represent Rakshasas (evil powers) from whose custody Sita is released. On this occasion while Brahmans offer tender barely shoots to their patrons, the sisters do the same to their brothers and both receive monetary gifts in return. This function is known as Nature. In villages, Giri, which precedes Diwali, is most significant. Every household decorates the horns of its cattle with peacock feathers which are considered sacred and covers their bodies with coloured cloth on which kauris (cowries) are sewn. On the third day, i.e. the days following Diwali, early in the morning gosar (cow dung cakes) are made to observe Govardhan Puja. This is done for the first time after the rainy season which indicates the end of the fermentation stage of cow dung.

Gugga Naomi

Gugga Naomi is a religious festival connected with snake worship observed on Bhadon 9 (August-September). A number of legends have clustered around Gugga, who is also called Gugga Pir or Zahir Pir (the Saint Apparent). Some also refer to him as Baggarwala (he of the Baggar) because of his grave near Dadrewa (near Ganganagar), a tract over which he is said to have ruled. Flourishing about the middle of 12th century, Gugga Bir (Gugga the Hero) commanded great respect. The Muslims going to his shrine are supposed to have altered the name of Gugga Bir to Gugga Pir (Gugga Saint). Some people, however, think that Gugga became a Muslim and hence the changed name. He was reputed to have the power of curing the people bitten by snakes. Monday is his day, the 9th is his date because he descended into the earth on Bhadon 9. Gugga Pir's shrine is distinguished by its square shape with minarets and domed roof and is known as Mari. This festival is particularly celebrated in the district at Samchana and Khanpur Kalan (Rohtak tahsil), Kanodah, Gurawar, Sewana, Rattanthal, Sahlawas, Chhappar, Patauda, Silana, Bahadurgarh and Jhajjar (Jhajjar tahsil).

Mela Devi

This festival is celebrated at Beri in the Jhajjar tahsil twice in the year on Chaitra Sudi 8 (March-April) and Asuj Sudi (September-October). According to the legend the image of goddess Bhimeshwari Devi was brought from the hills and installed at Beri. Newly married couples blessed with a son come here to pay homage.

Voluntary Organisations

Voluntary Organisations play a pioneer role in the provision of welfare service to the vulnerable sections of society i.e. women, children and handicapped persons. Northern region in the country is unfavourably placed as far as numbers of agencies working in this field are concerned as compared to the Southern region. However, there has been remarkable increase in the number of Voluntary Organisations after creation of Haryana State in 1966. These organisations not only undertake programmes with their own resources, but also implement projects sponsored by the State. Government also assigns importance to the welfare services and helps them by sizeable allotments.

As per Directory 2000, published by the Director, Social Justice & Empowerment, Haryana the following Welfare Organisations were functioning in different fields in the district:

1. Lord Shiksha Educational and Cultural Society, Dulehera, Jhajjar.

Located in Village Dulehera, it runs a Home for the welfare of destitute children and provides free educational and accommodation facilities to them.

2. Dr.Larance Memorial Education Society, Jhajjar.

Located in Jhajjar, it is engaged in the welfare of children.

3. Nav Jyoti, Bahadurgarh

Located on Balaur Road, Bahadurgarh, it is engaged in the welfare of women and provides training in cutting and tailoring.

4. Parbhat Gram Udyog Sangh, Dighal, Jhajjar.

Located in Village Dighal, it is engaged in the welfare of destitute women and provides sewing machines and tailoring training etc. to them.

5. National Education for the blind, Bahadurgarh, Jhajjar.

Located in Bahadurgarh, it provides free education and accommodation facilities for blind persons.

6. Rabsha Sewa Samiti, Gochhi, Jhajjar.

Located in Village Gochhi, Jhajjar, it runs a Home Society for public welfare.

7. Haryana Education Society, Jhajjar.

Located Opposite Rest House, Jhajjar, it is engaged in the welfare of destitute women and children.

(viii) Brief description of places of religious, historical or archaeological importance and places of tourist interest in the district:

Bahadurgarh (Bahadurgarh Tahsil)

The Town is situated 28 kilometres west of Delhi on the Delhi-Rohtak road. According to the Census of 2001, it has a population of 119,846 and it is tahsil as well as sub-divisional headquarters.

The Town settled by Rathi Jats was formerly known as Sharafabad. In A.D.1755, it was given in Jagir with 25 other Villages by Alamgir II, the Mughal Emperor, to two Baloches of Farrukhnagar, namely, Bahadur Khan and Taj Muhammad who built a fort and called it Bahadurgarh. After they had ruled over it for 40 years, their nephew succeeded them. The jagir was taken over by Scindhia in 1793, but not for long because in 1803 the British forces under Lord Lake defeated Scindhia and bestowed the Town and its dependent villages upon Mohammad Ismail Khan, brother of the Jhajjar Nawab. Ismail Khan's family retained this estate till 1857 when it was confiscated after the uprising of 1857 because the Nawab had sent an offering to the Emperor of Delhi and had also addressed him a letter of praise. The estate became part of the Rohtak district in 1860. The places of historical note in this Town are the tank of Bhagwan Dass, the temple of Murli Manohar, the Naqar Khana, the Mahalsarai (now in ruins) and the Qila mohalla.

The places of public utility in Bahadurgarh town include a P.W.D. rest house, post and telegraph office, telephone exchange, Kamla Nehru Municipal hospital, Employees' State Insurance dispensary, maternity and child welfare centre, veterinary hospital, Government girls' J.B.T. centre, Government industrial school for girls and a number of high/higher secondary schools. It has become an upcoming industrial centre of the district.

Gauriyya tourist resort is located in Bahadurgarh. It includes motel, restaurant, conference hall, bar, gift shop and lawns.

Jhajjar (Jhajjar Tahsil)

Jhajjar, called a town of tombs, is said to have been founded 1300 years ago by Chhajju Jat. It is the headquarters of the district and the tahsil of the same name. It is 32 kilometres south of Rohtak and 56 kilometres west of Delhi. The population of the Town according to the 2001 Census is 39,002.

The history of Jhajjar is involved in obscurity. Tradition says that the Town was first destroyed by the Ghuris. The old site is 4 kilometres south of the Town and was called Bhagulan. It existed in the times of Firuz Shah Tughluq who had dug a canal from the Satluj to Jhajjar. The place came into some historical eminence when its Nawab, Abdul Rehman Khan defied the authority of the British and took part in the Uprising of 1857.

Ain-I-Akbari recorded that Akbar (1556-1605) stayed at Jhajjar when his regent Bairam Khan dispatched the royal insignia and presents for the Emperor.

The places of antiquity in the Town include the tomb and tank of Shah Ghazi Kamal and a group of seven large tombs of local celebrities. The tomb of Shah Ghazi Kamal is in the north of the Town. Shah Ghazi Kamal is supposed to have fought against Prithvi Raj and his head was cut off in the encounter. Besides the tomb, there is a tank with a large ghat of 17 steps flanked by 2 octagonal towers on its western side. In the southern tower, there is an inscription which records that Durgah Mull made the tank in A.D. 1626. North and west of the tank are a mosque, a baradari (a summer house with several indoors), and a wall. All of these are now in ruins.

The group of seven tombs is in the eastern part of the Town on the Delhi road. This elegant group of tombs presents an imposing appearance. Some of these have a mosque and an idgah around them; others have cupolas supported on pillars and still others have heavy domes supported on walls. The men buried here were local celebrities. Besides, there are tombs of minor importance which include the tombs of Ghaibi Pir, Zahar Pir and Naugaza. A mosque, a resting place, a well and a tank surround the tomb of Naugaza.

The places of public utility in the town include a post and telegraph office, telephone exchange, civil rest house, civil dispensary, maternity and child welfare centre, a gurukul which has an archaeological museum attached to it, Nehru College, industrial training centre and a number of schools, etc.

Beri (Jhajjar Tahsil)

Beri in Jhajjar tahsil is known for its old temple dedicated to Bhimeshwari Devi. It is said that long ago the image of a goddess Bhimeshwari Devi was brought down from the hills and installed here.

Mohanbari (Jhajjar Tahsil)

Mohanbari is another site in Jhajjar tahsil which yielded the coins of Sri-Samanta linking this place with 10th century A.D.

(ix) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district:

After the struggle of 1857, Jhajjar came direct under the British Rule and was constituted as a new district but was abolished in 1860 and it was made a tahsil in Rohtak district. Apart from the Jagirdars who were punished for their anti-British activities during the uprising of 1857, the Rohtak district (including Jhajjar) itself suffered a set-back. It was not included in any of the developmental programmes. Thus it remained a backward district. The resources of peasants were crippled because of many years of draught and famine after 1895.

Arya Samaj movement accelerated the desire for reform. The movement spread soon to Jhajjar, Sanghi, Maham and Mahra after Rohtak. At this stage, a local leader, Chhotu Ram appeared on the scene whose dynamic personality exercised a deep influence on public life. Born in Jat family in Garhi Sampla, he shifted to Rohtak and practised as a lawyer in 1912. He founded Jat Sabha and published 'The Jat Gazette' in 1916 publishing interests of rural masses.

In response to the call given by Mahatma Gandhi in 1919, hartals were observed and demonstration held in March-April at Rohtak, Sonipat, Jhajjar and Bahadurgarh as a protest

against Rowlette Act. As an all India Programme, Jhajjar Congress Committee in 1921 responded to the efforts by hoisting Congress flag at Town Hall.

India became Independent on 15th August, 1947. Jhajjar areas remained tagged with Rohtak till the appearance of Jhajjar as an independent district for the second time on 15th July, 1997.

(x) Scope of Village and Town Directory:

Village Directory:

Concepts used in VD and TD of DCHB:

1. Educational Amenities:-The type of different educational facilities available in the village is given in numbers. Both Government and private educational facilities / institutions are considered for this-purpose. If there are composite schools like Middle schools with Primary classes, or Secondary schools with middle classes, these are included in the number of Primary and Middle schools respectively. For example, if in a village there are two Primary schools and one Middle school with primary classes, the number of Primary schools in the village are given as three and that of Middle school as one even though there may be only three educational institutions. So also in case of Secondary schools. For better understanding, the distinctiveness of different types of schools is depicted hereunder:

1.1 Pre-primary (PP): Now-a-days, the children are sent to schools at a very early stage. Lot of pre-primary schools, private schools in particular, have come up in villages and towns. These may or may not be recognized by the competent authorities. Even many Secondary schools have classes starting from preprimary level. Pre-primary classes include Nursery, K.G., Pre-basic, Play school, etc.

1.2 Primary School (P): Schools providing education from Standard 1 and upward up to and inclusive of Standard V are classified as Primary Schools.

1.3 Middle School (M): Schools providing education from Standard VI and upward up to and inclusive of Standard VIII are classified as Middle Schools. A School with Class 1 to VIII is treated as two units, i.e. one Primary School and one Middle School.

1.4 Secondary School (S): Schools providing education from Standard IX and upwards up to and inclusive of Standard X are classified as Secondary Schools. A composite school with 1 to X standard is treated as three separate units and counted separately under the categories of Primary School, Middle School and Secondary School.

1.5 Senior Secondary School (SS): Schools and colleges that provide education for Standards XI and XII and first and second year of the Pre-University Course fall under this category. There are Senior Secondary Schools with Standard I and upwards up to Standard XII.

1.6. Degree College: (i) **Arts/Science/Commerce:** These are all educational institutions that provide post-PUC level education leading to University degree/diploma in any subject or combination of subjects and also post-graduate levels of education. The college offering courses in Arts, Science or Commerce either separately or in combination are covered under this category.

(ii) **Engineering College (E):** It is a graduate/post-graduate degree college providing Bachelor of Engineering (BE) or Bachelor of Technology (B. Tech.) or post-graduate engineering degrees like M.Tech.

(iii) **Medical Colleges:** These are graduate/post-graduate degree colleges providing MBBS or equivalent degree in alternative medicine like Ayurveda, Unani, Homeopathy etc. or post-graduate medical degrees like M.D or equivalent in the above branches of medicine.

1.7. Management College/ Institute (MI): It offers courses like Diploma in Management, Post-Graduate Diploma in Management, Masters of Business Administration (MBA) and specializations in different disciplines of Management like Marketing, Human Resources Development (HRD) etc.

1.8. Polytechnic (Pt): An Institution providing certificate/diploma (not equivalent to degree) in any technical subject like engineering, vocational courses like embroidery, fashion designing etc. It may be both Government and Private.

1.9. Vocational School/ITI: It is a vocational training institute imparting trainings in specific fields acquiring necessary skill, which will make the trainees employable or create them opportunities of self-employment. Trainings offered by Industrial Training Institutes (ITI) fall under this category.

1.10. Non-formal Education/Training Centre (NFTC): Non-vocational education centers, established by the Central and State Governments provide educational facilities to the interested persons irrespective of educational qualification, and age. These education centers are open to all.

1.11. Special School for Disabled: There are Government and Government recognized institutions/organizations engaged for providing education to different groups of disabled persons.

2. Medical Facilities: 2.1 Hospital-Allopathic and Hospital-Alternative medicine: A hospital is an Institution, where sick or injured are given medical or surgical care. Bed strength differs from hospital to hospital ranging from 31 to 500 depending upon whether these are sub-district, sub-divisional or district hospitals. If there are hospitals providing facilities under different systems of medicines such as, Allopathy, Ayurveda, Unani and Homeopathy etc., these details are given separately.

(a) Allopathy: The system of medical practice, which treats disease by the use of remedies which produce effects different from those produced by the disease under treatment.

(b) Ayurveda: Ayurveda means ‘Science of life’. The philosophy of Ayurveda is based on the theory of Pancha Mahabhootas (Five elements) of which all the objects and living bodies are composed of. The combination of these five elements is represented in the form of Tridosha: Vata, Pitta and Kapha. These three ‘doshas’ are physiological entities of living beings. Ayurveda developed into eight distinct specialities, i.e., Internal Medicine, Pediatrics,

Psychiatry, Eye and ENT, Surgery, Toxicology, Geriatrics and Science of virility. Two types of treatments, Preventive and Curative, are given in Ayurveda.

(c)Unani: Treatment of Unani consists of three components, namely, preventive, primitive and curative. Unani system of medicine has been found to be efficacious in conditions like Rheumatic Arthritis, Jaundice, Filarisis, Eczema, Sinusitis and Bronchial Asthma. For the prevention of the disease and promotion of health, the Unani System emphasizes six essentials: pure air, food and water, physical movement and rest, psychic movement and rest, sleep and wakefulness and retention of useful materials and evacuation of waste materials from the body.

(d)Homoeopathy: Treatment in Homoeopathy, which is holistic in nature, focuses on an individual's response to a specific environment. Homoeopathic medicines are prepared mainly from natural substances such as plant products, minerals and animal sources. Homoeopathic medicines do not have any toxic, poisonous or side effects. Homoeopathic treatment is economical as well and has a very broad public acceptance.

2.2 Community Health Centre (CHC): Community Health Centres are designed to provide referral health care for cases from PHC and those in need of specialist health care approaching the CHC directly. 4 PHCs are included under each CHC thus catering approximately 80,000 populations in tribal/hilly areas and 1, 20,000 populations for plain areas. CHC is a 30- bedded hospital providing specialist care in Medicine, Obstetrics and Gynaecology, Surgery and Paediatrics.

2.3 Primary Health Centre (PHC): A Primary Health Centre is the first contact point between a village community and the Government medical officer. A PHC covers a population of 20,000 in hilly, tribal or difficult areas and 30,000 populations in plain areas with 4-6 indoor/observation beds. It acts as a referral unit for 6 sub-centres. It has a medical officer and para medical staff.

2.4 Primary Health Sub- Centre (PHS): A Primary Health Sub-centre is the first contact point between the primary health care system and the community. As per the population norms, one PHS is established for every 5,000 population in plain areas and 3,000 population in hilly/ tribal/ desert areas. Each PHS has a sanctioned strength of one male and one female health worker.

2.5 Maternity and Child Welfare Centre (MCW): It provides pre-natal and post-natal services for both mother and child. The services include regular check-up of pregnant women, giving folic tablets, counselling, delivery, immunization of children with check-up etc.

2.6 TB Clinic (TBC): The diagnosis and treatment of TB are functions of the general health services and hence it is a part and parcel of Primary Health Care. Specialized units such as the District Tuberculosis Centre (DTC) act as referral centres. TB clinics are established by the Government of India under the National Tuberculosis Control Programme and implemented through a network of DTC. The DTC is the nodal point for TB control activities in the district and it also functions as a specialized referral centre. The functions of sub-district level

Tuberculosis Unit (TU) are implementation, monitoring and supervision of TB control activities in its designated geographical areas.

2.7Health Centre: Clinic where medicine and medical supplies are dispensed. It has no in-patient facility. A clinic (or an outpatient clinic) is a small private or public health facility that is devoted to the care of outpatients, often in a community, in contrast to larger hospitals, which also treat inpatients.

2.8Dispensary: Place where patients are treated and medicines provided but with no in-patient facility. Immunizations, MCH Services and sometimes pathological tests are carried out here. It may be of allopathic or any alternative medicine.

2.9Veterinary Hospital: Mostly run by the State Government or local body for treatment and preventive measures against diseases of domestic animals like cows, buffaloes etc in rural areas.

2.10Mobile Health Clinic: These are Mobile vans well equipped with a range of health services to villages located far away from the CHCs, PHCs or any public health sources. The vans visit villages on designated days to deliver the health care services. The services generally offered are OPD, ante-natal and post-natal, B.P. examination, X-ray, ECG, Immunization, First Aid etc.

2.11 Family Welfare Centre: Check-up and counselling is provided to the pregnant and married women regarding small family norm and devices for having a small family. Temporary and permanent contraceptive devices are provided here.

2.12Nursing Home: A nursing home is a long –term care facility licensed by the state that offers 24-hour room and board and health care services including basic and skilled nursing care, rehabilitation and a full range of other therapies, treatments and programs to old and sick people. The difference between a hospital and a nursing home is that a nursing home gives importance to convalescence from a disease while a hospital gives medical treatment for the disease.

2.13Medicine Shop: A shop which sells drugs and medicines of any system of medicine viz. allopathic, homeopathic, ayurvedic or unani medicines, is considered as a medicine shop. Sometimes some shops and Paan shops also keep ordinary medicines, like Crocin, Burnol etc. These shops are not taken as medicine shops.

3. Drinking water: The following are the main source of drinking water facility (ies) available in the village.

3.1 Tap Water-treated: This source of drinking water refers to a source of drinking water which is provided to the villagers through pipes within their premises or to the villagers through common taps (public taps/community water points) by the Government departments, local bodies, panchayats, public or private estate agencies, etc. after treatment. Such a source is treated as ‘Tap water from treated source’.

3.2 Tap Water-un-treated: If the villagers are drawing drinking water through pipes either directly from a well or bore well or after pumping the well or tube well water, or the water is

supplied through pipes to the households of the village or through public taps without treatment. Such a source is treated as 'Tap water from un-treated source'.

3.3 Covered Well (CW): A well that is (1) covered on sides from run-off water (i.e., excess water from rain, snowmelt or other sources flows over the land) through a wall lining or casting that is raised above ground level on a platform that diverts spilled water away from the well and (2) covered so that bird droppings and animals cannot fall down the hole. It is considered as covered well.

3.4 Un-covered Well (UW): A well which is (1) un-covered on sides from runoff water, (2) un-covered from bird droppings and animals; or (3) both.

3.5 Hand Pump (HP): Hand pump means where ground water is taken out manually by operating a hand pump.

3.6 Tube Well / Borehole (TW): Tube well denotes the ground water source from where ground water is taken out through electrical or diesel pump. Spring, River/Canal, Tank/Pond/Lark are self explanatory.

4. Community Toilet Complex : Community Toilet may be constructed and maintained by Gram Panchayats or Private NGOs like Sulabh Sauchalaya or likes.

5. Rural Sanitary Mart or Sanitary Hardware Outlet (RSM): It is an outlet dealing with the materials, hardware and designs required for the construction of not only sanitary latrines but other sanitary facilities such as compost pit, washing platform and other sanitation and hygiene accessories required for individuals, households and the environment in the rural areas.

6. Community bio-gas or recycle of waste for productive use: Many of the solid wastes having economic values but put for disposal can be recycled for reuse. For example, food, cow dung, leaves, vegetable, paper, wood, plastics, old cloth etc. However, some of the wastes are not recyclable. These are carbon paper, thermo coal etc. When recyclable solid wastes are subjected to decomposition, bio-gas could be produced under favourable conditions. These systems of recycling may be there at the village level organized by Gram Panchayats with technical support from Governments or non-government organizations.

7. Communication and transport Facilities:

7.1 Post Office (PO): Self-explanatory.

7.2 Sub-Post Office (SPO): Sub-post office includes Extra Departmental Post Offices and those providing franchise postal services and also part time services in lieu of some honorarium. The limited postal services include sale of stamps, receipt of letters and money orders and also distribution of letters.

7.3 Post & Telegraph Office (PTO): Telegraph office is set up by the Government to enable people to send or receive telegrams. If the phonogram facility is available (though the Telegraph office may not be equipped with Morse Code Transmitters), the village is considered to be having telegraph facility.

7.4 Telephones (landlines): If the village is having the Public Call Office (PCO) either run by the Post Office or by individuals or by a private shop, then the village is considered to be having telephone facility.

7.5 Public Call Office (PCO)/Mobile PCO: Self explanatory.

7.6 Mobile Phone Coverage: Mobile phones are now very common particularly in urban areas. Some villages by virtue of being in close proximity to the urban areas also enjoy the benefits of the mobile phone services. Even if a few villagers avail the services of mobile phones, then the village is considered to be having access to mobile phone.

7.7 Internet Cafes/Common Service Centres (CSC): If the village is having the facility of Cyber Cafes or shops owned by private individuals providing the facility of surfing of the internet, then the village is considered to be having access to internet/cyber cafe facility. Government of India formulated the scheme of CSC with the vision of providing all government services in an integrated manner at the door step of the citizen at an affordable cost even in the remotest corners of the country through a combination of it based as well as non-IT based services.

7.8 National Highway (NH): These are main highways running through the length and breadth of the country. Each NH is numbered like NH-1, NH-2 for easy identification.

7.9 State Highway (SH): These are roads of a state linking district headquarters and important cities within a State and connecting them with NHs or Highways of the neighbouring States.

7.10 Major District Roads (MDR): These are important roads within a district, serving areas of production and markets and connecting these with each other or with the main Highways.

7.11 Other District Roads (ODR): These are roads serving rural areas of production and providing them with outlet to market centres, taluka headquarters, block development headquarters or other main roads.

7.12 Village Road: The approach to village refers to the state of road etc., leading to the village. This is to see whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

7.13. Black-Topped (Pucca) Road (BTR): A road provided with a bituminous surfacing.

7.14 Gravel (Kuchha) Road (GR): A road constructed using well compacted crushed rock or gravel material (coarse sand, small stones), which is fairly resilient and does not become slippery when wet.

7.15 Water Bound Macadam (WBM): This is the road layer made of crushed or broken mixture of sand and rock fragments mechanically interlocked by rolling and voids filled with screening and binding material with the assistance of water.

7.16 Foot Path (FP): A trodden path for the use by pedestrians and in some cases bicycles. The Foot Paths are not suitable for vehicular traffic except bicycles in some cases. Most of the interior/forest villages are connected by Foot Paths.

8. Banks and Credit Societies: -Banking facility means a place where a person can operate a bank account.

8.1 Commercial Bank (CB): These may be banks wholly owned by the Government of India, or by Indian or Foreign Companies.

8.2 Cooperative Banks (Coop. B): A co-operative bank is a financial entity which belongs to its members, who are at the same time the owners and the customers of their bank. Cooperative banks are often created by persons belonging to the same local or professional community or sharing a common interest. These banks are registered under the Cooperative Societies Act. The cooperative banks are regulated by RBI and are covered by the Banking Regulations Act, 1949.

8.3 Agricultural Credit Society (ACS): Major objectives of the ACS are to supply agricultural credit to meet the requirements of funds for agricultural production, the distribution of essential consumer commodities, the provision of storage and marketing facilities and for light agricultural implements and machinery.

8.4 Non-Agricultural Credit Society (NCS): These societies include consumer cooperative societies and also credit cooperative societies of certain categories of persons like teachers, health workers, etc.

9. Miscellaneous Facilities:

9.1 Self-help Group (SHG): Self-Help Groups are groups of between 10-25 women created by either NGOs or under the SGSY (Swarnjayanti Gram Swarozgar Yojana) for the purposes of meeting local credit needs. They are sometimes called Mahila Mandals in villages.

9. 2. Public Distribution System (PDS) shop: The shops through which some essential commodities are sold by the government at subsidized rates. They may also be known as ration shops and control shops.

9.3. Mandis/Regular Market: These are those clusters of shops with or without fixed premises which are open on at least six days a week and opens at least from morning hours to dusk.

9.4. Weekly Haat: These are those clusters of shops with or without fixed premises which are open once a week.

9.5. Agricultural Marketing Society: It is a common platform to analyse the issues among all the individuals and institutions in the field of agricultural marketing.

9.6. Nutrition Centre: Integrated Child Development Services (ICDS): The Integrated Child Development Services (ICDS) Scheme set up by the Government of India with the objective of providing following package of services to the children under 6 years and pregnant and lactating mothers in villages such as; Immunization, Health Check-up, Referral Services, Pre-school Non-formal Education and Nutrition & Health Education.

9.7. Anganwadi Centre: Each centre under the ICDS scheme is run by an Anganwadi Worker. One Anganwadi worker is appointed for specified population of the village. They are basically local women. They are assisted by Anganwadi helper. They provide pre-school non-formal education at the Centre and provide food to the children.

9.8. Accredited Social Health Activist (ASHA): ASHA is a health activist in the community who will create awareness on health and its social determinants and mobilize the community towards local health planning and increased utilization and accountability of the existing health services. She would be a promoter of good health practices. She will also provide a minimum package of curative care as appropriate and feasible for that level and make timely referrals. She will act as a motivator of different types of health related activities. Unlike ANM, she will not be involved in any clinical activities like immunization.

9.9. Sports Club/Recreation Centre: Indoor and out-door games are arranged by the Club and activities like wrestling, Judo Karate etc. are also done there.

9.10. Cinema/Video Hall (CV): If regular cinema houses licensed by Government are available, then the town/village is considered to be having the facility of Cinema Hall. Video hall owners screen films in their own or hired premises.

9.11. Public Library: Books are kept there which can be accessed by the public on loan basis. These may be sponsored by Government or Local Body or Panchayat or any influential person. Free service or nominal charges are made for using the facility.

9.12. Public Reading Room: Here the public may read newspapers and magazines. These may be sponsored by Government or Local Body or Panchayat or any influential person.

9.13. Newspaper Supply: The availability of the Newspaper(s), both in English or vernacular, in the village is considered to having the said facility.

10. Availability of Electricity/Power. If power is actually available, whatever may be the form of its use, it is indicated affirmative. If the village is having electricity for domestic purposes and the residents are using the same for domestic use, then it is considered that domestic power supply is available. If the electricity authority has not given domestic supply to the households on their request and people are using unauthorized electricity either by stealthily or misuse the supply meant for agricultural or industrial purposes, then it is not considered as availability of electricity for domestic purposes. However, if the village goes out of power due to temporary technical problems such as, transformer failures, theft of electrical equipment, etc., it is considered that electricity is available. Supply of electricity is considered available even when there is a temporary ban on new domestic connections. Connections to residential houses, bungalows, clubs, hostels and hospitals run on non-commercial basis, charitable, educational and religious institutions are included in the domestic category.

10.1 Power Supply for domestic use: This category includes electricity used only for domestic consumption.

10.2 Power supply for agricultural use: This category includes all electricity connections given to the farmers for conducting various agricultural activities including irrigation.

10.3 Power supply for commercial use: This category includes electricity connections given for workshops, industries etc. or for any commercial purposes.

10.4 Power supply for all uses: This category includes electricity connection is available for domestic use, agricultural use, and for any commercial purposes.

11. Land Use Pattern: The land use area of the villages is given in hectares. The land use pattern in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the 9 categories as indicated in the Village Directory.

12. System of drainage: Generally, by drainage system, we mean the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in towns, which are not provided with such underground sewerage system, it is mentioned whether it has open drainage system. There may be possibility of the town having both closed as well as open drainage systems.

13. Type of latrines: The data on various types of latrines both public and private together are collected. The three types of latrines considered here are, Pit Latrine, Flush/Pour Flush Latrine and Service Latrine.

(i) Pit System: The latrines are attached to the pit that is dug into the ground for the reception of night soil, are reckoned as pit latrine.

(ii) Flush/pour flush: A flush latrine uses a cistern or holding tank for flushing water and has a water seal, which is a U-shaped pipe, below the seat or squatting pan that prevents the passage of flies and odours. A pour flush latrine uses a water seal, but unlike a flush latrine, a pour flush latrine uses water poured by hand for flushing (no cistern is used).

(iii) Service: Type of latrine from where night soil is removed manually by scavengers. All other types of latrines are covered under “Others” category.

14. Protected Water Supply- Source and capacity of Storage system: There are various sources of water supply and its storage system in the town.

14.1 Service Reservoir: A service reservoir is a water storage container that holds clean water after it has been treated in a water plant, and before it is piped to the end users. These containers are covered, and are designed to keep the water safe from contamination. Their main purpose is to provide a buffer within the water supply system so that water supplies can be maintained across periods of varying demand.

14.2 River Infiltration Gallery: Infiltration Galleries are capable of supplying large quantities of water, and are used where wells are unable to supply water needs, i.e. where an impermeable rock barrier affects well efficiency, or where surface water sources are too shallow for **intake screens**. Infiltration galleries are one or more horizontal screens placed adjacent to (on-shore), or directly underneath (bed-mounted), a surface water source.

14.3 Bore Well Pumping System: A bore well is a well of 6" to 12" in diameter drilled into the earth for retrieving water. The depth of a bore well can vary from 50 feet to 3000 feet. Water is pumped out to surface through electricity/generator.

14.4 Pressure Tank: Tank that is used to ensure consistent water pressure and for storage of water. Usually located in basement of house but sometimes (in older settings) located in well pit.

15. Road lighting (Points): Road lighting means the number of street lights that are maintained in the town.

16. Home Orphanage: Orphanage is the name to describe a **residential institution** devoted to the **care of orphans**—children whose parents are deceased or otherwise unable to care for them. Parents, and sometimes grandparents, are legally responsible for supporting children, but in the absence of these or other relatives willing to care for the children, they become a **ward of the state**, and orphanages are a way of providing for their care and housing.

17. Working women's hostel: These may be recognised or non-recognised by any public authority. The data on number of working women's hostels available in the town are collected with number of seats.

18. Old Age Home: There are two types of Old Age Homes in India. One is the "Free" type which cares for the destitute old people who have no one else to care for them. They are given shelter, food, clothing and medical care. The second type is the "Paid" home where care is provided for a fee. Nowadays, such "Retirement" homes have become very popular in India and they are well worth considering.

19. Stadium: A stadium is a place, or venue, for (mostly) outdoor **sports**, concerts or other events, consisting of a field or stage partly or completely surrounded by a structure designed to allow spectators to stand or sit and view the event.

20. Auditorium/Community Hall: These are the places where meetings, social functions etc. are organised.

Town Directory:

There are seven statements in the Town Directory. These statements have been compiled from the information supplied by the local bodies of the State and the contents thereof are as follows:

Statement I:

This statement gives class, name and civic administration status of the town and its location code which runs into eight digits, name of tahsil, name of C.D. block in case of non-municipal (Census) towns, number of households, population and decadal growth rate of the towns 1901 - 2011 density of population and sex ratio for the last three decadal Censuses.

Statement II:

This statement provides data on physical aspects viz; rainfall, temperature of towns, location of town with respect to its distance from State/district/ tahsil headquarters, from the nearest city/railway station/ bus route, etc.

Statement III:

This statement indicates civic and other amenities available in each town of the district. The details given under civic and other amenities include availability of road length in km, both kutcha and pucca, system drainage, number of latrines and method of disposal of night

soil, protected water supply, fire fighting service and number of electric connections available in the town.

Statement IV:

Statement IV explains the states of medical facilities in each town. The medical facilities cover number of hospitals (allopathics& other)/dispensaries/ health center / family welfare center/ maternity and child welfare centers.

Statement V:

Statement V explains the status of medical, educational, recreational and cultural facilities in the town. The medical facilities cover number of hospitals/dispensaries/TB clinics. The number of beds available under each type of medical institutions is also given. Similarly, the educational facilities shown include availability of Arts/Science/Commerce/Law/Other colleges of degree level and above, medical colleges, polytechnics, shorthand, typewriting and vocational training institutions, higher secondary/intermediate/PUC/Junior college level, secondary/matriculation, junior secondary/middle school, primary school and adult literacy classes/centres. This statement also includes information on working women's hostels along with number of seats and number of recreational and cultural centres, like stadia, cinema, auditorium/theatre/community halls, public libraries reading rooms etc.

Statement VI:

This statement deals with industry and banking data in 2009. Townwise information is depicted on three most important commodities manufactured, commercial, co-operative banks and number of agricultural and non-agricultural credit societies in each town.

Statement VII:

In view to collect an exhaustive information in slum demography etc., this separate statement has been introduced. Slum data collected in this Statement will be used as an aid and tool for urban planning of the towns. Various types of information viz., name of the slum area, total number of households and population of the slum areas, availability of paved roads (in kms.) in the slum area, system of sewerage, number of latrines (private and community) available, method of disposal of night soil, number of tap points installed for the supply of protected water and electric connections available for domestic road lighting and other purposes have been collected in this statement.

Village and Town Directory

Brief Note on the Village and Town Directory for the DCHB, Census of India, 2011.

Village Directory 2011 Census:-

The Village Directory is being compiled for both inhabited and un-inhabited villages. In the village directory both private and government facilities/institutions have been given. In case of un-inhabited /depopulated villages, the location code number, name and area of the village is being given universally in Village Directory and Village PCA. The columns relating to the amenities and land use pattern, etc. being left blank and it will be noted against the name of the village that it is un-inhabited/depopulated. The Appendices to Village Directory and Inset Tables based on village Directory data are also prepared for inhabited villages.

In the Village Directory format for 2011 Census there are 121 columns and the details thereon are as follows:

Columns 1: Serial Number: - Self explanatory. All the villages within the CD block are presented serially in the ascending order of their location code number.

Columns 2: Name of village: - Self explanatory. The name of the villages is shown against this column. This also includes the forest and uninhabited villages.

Columns 3: Location Code Number of village. The location code number of the villages is shown against this column.

Columns 4: Area of the Village: - The area of the villages has been given in hectares.

Column 5: Total Population: -The total population of the village as per 2011 Census has been given against this column.

Column 6: Number of Households: -The number of households as per 2011 Census has been given in this column.

Amenities: - The availability of different infrastructural amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, recreation and cultural facilities, communication, power, etc. in each village have been given in the Village Directory. Wherever the amenities are not available in the village, the distance range code viz; 'a' for <5 Kms, 'b' for 5-10 Kms and 'c' for 10+ Kms of the nearest where facility is available is given. Column wise details are given below:

Columns No. 7 – 20 Educational Facilities: - All the different educational facilities available in the village have been given under these columns. Nursery/LKG/UKG classes are included in Pre-Primary Schools, Classes up to class V included in Primary School; Classes from VI to VIII are included in the Middle school. Classes from IX and X included in Secondary School. Classes from XI and XII are included in Senior Secondary School. In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools,

respectively. The information on the entire educational institutes is given under these columns.

Columns No. 21 to 38 - Medical Facilities: - All the different medical facilities available in the village have been given under these columns.

Columns No. 39 to 46 -Drinking Water: - The information on availability of various types of the drinking water facility within the village has been given under these columns.

Columns No. 47 to 50 – Availability of Toilet and others:- The information on availability of toilet and Bio-Gas etc. available in the village has been given under these columns.

Columns No. 51 to 67 Communication (Post & Telegraph and transport):- The information on communication and Post Office, Sub-Post Office, & Telegraph Office, Village PIN Code number, Phone-Landlines, Mobile Phone, Private Courier Facility, Internet Café, etc; available in the village has been given under these columns. The information on all various transport facilities whether public/private transport like Bus, Railway Station, or Navigable waterways, Taxi , Van, Tractors etc. available in the village has also been given under these columns.

Columns No.68 to 79 – Village connected to High ways, Village Roads, Banks and Credit Societies: - The information on all roads connected to village has been given under these columns. These include National Highway, State Highway, District Roads and other district roads connected to the village, Pucca roads, Kutchcha Roads, Water Bounded Macadam Roads, Navigable Water Ways and Foot Paths has been given under these columns. Further, the information on availability of banks, ATM and Agricultural Credit societies in the village has been given under these columns.

Column No. 80 to 96 Miscellaneous Facilities: - The information on various miscellaneous facilities available in the village has been given under these columns. These includes Self - Help Group, Public Distribution Shop (PDS), Mandi /Regular Market, Weekly Haat, Agricultural Marketing Society, Nutrition Centre(ICDS), Anganwadi Centre, ASHA, Community Centre, Sports Fields, Sports Club/Recreation Centre, Cinema/Video Halls, Public Library, Public Reading Room, News Paper Supply, Assembly Polling Station, Birth and Death Registration Office.

Columns No. 97 to 100 – Electricity: - Availability of Power Supply in the village, whatever may be the form of its use has been given in these columns. These include Electricity for Domestic Use, Electricity for Agriculture Use Electricity for Commercial Use, and Electricity for all purpose Domestic Uses.

Column No. 101 and 102 -Nearest Town: - The name of the nearest town along with the distance range code has been in these columns.

Land use and Irrigation: - The land use pattern in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the following 9 categories.

(i)-Column No. 103 -Forests:-This includes all lands classed as forest under any legal enactment dealing with forests or administered as forests, whether state-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forests remain included under the forest area.

(ii)-Column No. 104- Area under non-agricultural use:-This includes all lands occupied by buildings, roads and railways or under water, e.g. rivers and canals and other lands put to uses other than agriculture.

(iii)-Columns No. 105-Barren and un-culturable land:-This includes all barren and unculturable land like mountains, deserts, etc. land which cannot be brought under cultivation except at an exorbitant cost should be classed as unculturable whether such land is in isolated blocks or within cultivated holdings.

(iv)-Column No. 106- Permanent Pastures and other Grazing Lands:-This includes all grazing lands whether they are permanent pastures and meadows or not. Village common grazing land is included under this head.

(v)-Column No. 107-Land under Miscellaneous Tree Crops, etc.: - This includes all cultivable land which is not included in 'Net area sown' but is put to some agricultural uses. Lands under Causing trees, thatching grasses, bamboo bushes and other groves for fuel, etc. which are not included under 'Orchards' are classed under this category.

(vi)-Column No. 108- **Culturable Waste Land:** - This includes lands available for cultivation, whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for one reason or other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may be assessed or unassessed and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for five years in succession is also included in this category at the end of the five years.

(vii)-Column No. 109- Fallow Lands other than Current Fallows: - This includes all lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years.

(viii)-Column No. 110- Current Fallows: - This represents cropped area, which is kept fallow during the current year. For example, if any seeding area is not cropped against the same year it may be treated as current fallow.

(ix)-Column No. 111- Net Area Sown: -This represents the total area sown with crops and orchards. Area sown more than once; in the same year is counted only once.

Column No. 112- Total Irrigated Land Area: - It includes all land which is cultivable and irrigated by any source of irrigation. The total irrigated area of the village has been given under this column.

Column No. 113- Total Un-Irrigated land Area: - Un-Irrigated area includes all land which is cultivable but not irrigated by any source of irrigation. The total un-irrigated land area of the village has been given under this column.

Column No. 114 to 118 Area Irrigated by source: - The area irrigated by various source of irrigation in the village have been given under these columns. The different source of irrigation facilities available in the village are as follows:

(i)-Canals(C)-Govt. or Pvt., (ii)-Wells/Tube-wells (W/TW), (iii)-Tanks/Lake(T/L), (iv)-Waterfall,(WF) and (v)-Others(O).

Columns No.119 to 121-Three most important commodities manufactured:-The names of three most important commodities manufactured in the village are indicated in this column.

C.D.Block level totals of the Village Directory:-

At the end of entries for the Village Directory of each C.D. Block, the totals of different columns are being given wherever possible. However, in case of some of the columns, it may not be possible to work out the CD Block level totals, in such cases the particular of relevant columns are being left blank against C.D.Block level.

Appendices to Village Directory: - The Village Directory also includes the following appendices:

Appendix –I: Summary showing total number of villages having Educational, Medical and other amenities in villages – C.D. Block level.

Appendix I A: Villages by number of Primary Schools.

Appendix I B: Villages by Primary, Middle and Secondary Schools.

Appendix I C: Villages with different sources of drinking water facilities available.

Appendix II: Villages with 5,000 and above population which do not have one or more amenities available.

Appendix -III: Land utilization data in respect of Census towns.

Appendix -IV: C.D. Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix -V: Summary showing number of Villages not having Scheduled Caste population.

Appendix -VI: Summary showing number of Villages not having Scheduled Tribe population.

Appendix -VII A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix- VII B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix -VIII: Number of villages under each Gram Panchayat (C.D. block wise).

.....

Note explaining the abbreviations used in Town Directory 2011 Census:-

Statement I :- Status and Growth History:

Column 1 – Serial Number:- Self explanatory

Column 2:- Class, Name and civic status of town:- The Class is presented according to population of the towns in 2011 Census as follows:

Population	Class	Population	Class
100,000 and above	I	10,000 – 19,999	IV
50,000 – 99,999	II	5,000 – 9,999	V
20,000 – 49,999	III	Below - 5,000	VI

The following abbreviations are used to denote the Civic Status of the town.

Civic Status	Codes	Civic Status	Codes
i-Municipal Corporation	M.Corp.	xii – Notified Town Area	NTA
ii-Municipal Committee	MC	xiii – Industrial Notified Area	INA
iii-Municipal Council	M Cl	xiv – Industrial Township	ITS
iv-City Municipal Council	CMC	xv – Township	TS
v-Town Municipal Council	TMC	xvi – Town Panchayat	TP
vi- Municipal Board	MB	xvii – Nagar Panchayat	NP
Vii –Municipality	M	xviii – Town Committee/ Town Area Committee	TC
viii- Cantonment Board/Cantonment	CB	xix – Small Town Committee	ST
ix- Notified Area	NA	xx – Estate Office	EO
x –Notified Town	NT	xxi –Gram Panchayat	GP
xi - Notified Area Committee/ Notified Area Council	NAC	xxii – Census Town	CT

Column 3 - 25: - These columns are self explanatory

Statement II: - Physical Aspects and Location of town, 2009.

Column 1 - 2 Serial number and Name of town: - Self explanatory

Columns 3 to 5 - Physical Aspects:-In these columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Columns 6 to 12:- Name and road distance of the town (in kms.) from the State headquarters, District headquarters, Sub-divisional/Taluk/Tahsil/ Police station/Development Block/Island HQ., Nearest city with population of one lakh and more, Nearest city with population of five lakh and more, Railway station and Bus route is recorded in these columns respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Statement III – Civic and other Amenities, 2009:-

Column 1 - 2 Serial number and Name of town: - Self explanatory

Column 3 – Road length (in km.): - The information about the road length (in km.) within the limit of the town is recorded in this column.

Columns 4 to 7- System of drainage: - The system of drainage available in the town is indicated in these columns by the following codes:

System of drainageCodes

Open drains OD

Closed drains CD

Both drains BD

Columns 8 to 11-Number of latrines: - The number of various types of latrines available in the town is indicated in these columns.

Columns No. 12 & 13 – Protected water supply: - The information on source of water supply and system of water storage with capacity available in the town are given in these columns in the following codes:

Column 12 (Source of water supply):-

- | | | |
|-------|-----------------|----|
| (i) | Tap water | T |
| (ii) | Tube-well water | TW |
| (iii) | Tank Water | TK |
| (iv) | Well water | W |

Column 13 (System of water storage):-

- | | | |
|-------|----------------------------|-----|
| (i) | Over Head Tank | OHT |
| (ii) | Service Reservoir | SR |
| (iii) | River Infiltration Gallery | RIG |
| (iv) | Bore Well Pumping System | BWP |
| (v) | Pressure Tank | PT |

The information on 2 major source of water supply is given in column 12 and the system of water storage with capacity against each in kilo-litres (in bracket) is presented in column 13.

Columns 14 Fire Fighting Service: - In case the fire fighting service is available in the referent town, 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Columns 15 to 19- Electrification (Number of connections):-Different types of electric connections have been shown in these columns, i.e., Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement IV: Medical Facilities, 2009:-

Columns 1 - 2 Serial number and Name of town: - Self explanatory

Columns 3 to 13 :- The number of various medical institutions such as Hospitals, Dispensaries, Health Center, Family Welfare Center, Maternity and Child Welfare Center, Maternity Homes, T.B. Hospital/clinic, Nursing Homes, Charitable Hospital/Nursing Home, Mobile Health Clinic and Others as available in the town, are indicated in these columns (along with number of beds in brackets).

If a medical facility is not available in the town, the name of the nearest place and its distance in kilometers from the town where the facility is available is mentioned.

Column 14 - Veterinary Hospital:-The Number of Veterinary Hospitals available in the town is given in this column.

Column 15 - Medicine Shop:-The number of Medicine shops available in the town is given in this column.

Statement V: Educational, Recreational and Cultural Facilities, 2009:-

Columns 1 - 2 Serial number and Name of town: - Self explanatory

Columns 3 to 15 Educational Facilities:- The information on number of Primary school, Middle school, Secondary school, Senior Secondary school, Arts/Science/ Commerce colleges (of degree level and above), Medical colleges, Engineering colleges, Management Institute/Colleges, Polytechnics, Recognized Shorthand, Typewriting and vocational training Institutions, Non-formal Education Center (Sarva Shiksha Abhiyan Center), Special School for disabled and Others available in the town, are indicated in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometers from the town where the facility is available is mentioned.

Columns 16 to 23 – Number of Social, Recreational and Culture Facilities :- The information on No. of Home Orphanage, Working women's hostels (with No. of seats in bracket), No. of Old Age Home, Stadium, Cinema Theatre, Auditorium/Community halls, Public libraries and Reading rooms available in the town are given under these column.

Statement VI: Industry and Banking 2009:-

Columns 1 - 2 Serial number and Name of town: - Self explanatory

Columns 3 to 5 - Names of three most important commodities manufactured:-The names of three most important commodities manufactured in the town are given under these columns.

Columns 6 to 8 - Number of banks: - The number of banks available in the referent town both Commercial and Co-operative banks are recorded against these columns.

Columns 9 & 10 – Number of Agricultural and Non Agricultural Credit Societies: - The number of Agricultural and Non Agricultural Credit Societies available in the referent town are given in these columns.

Statement VII: Civic and other Amenities in Slums, 2009:-

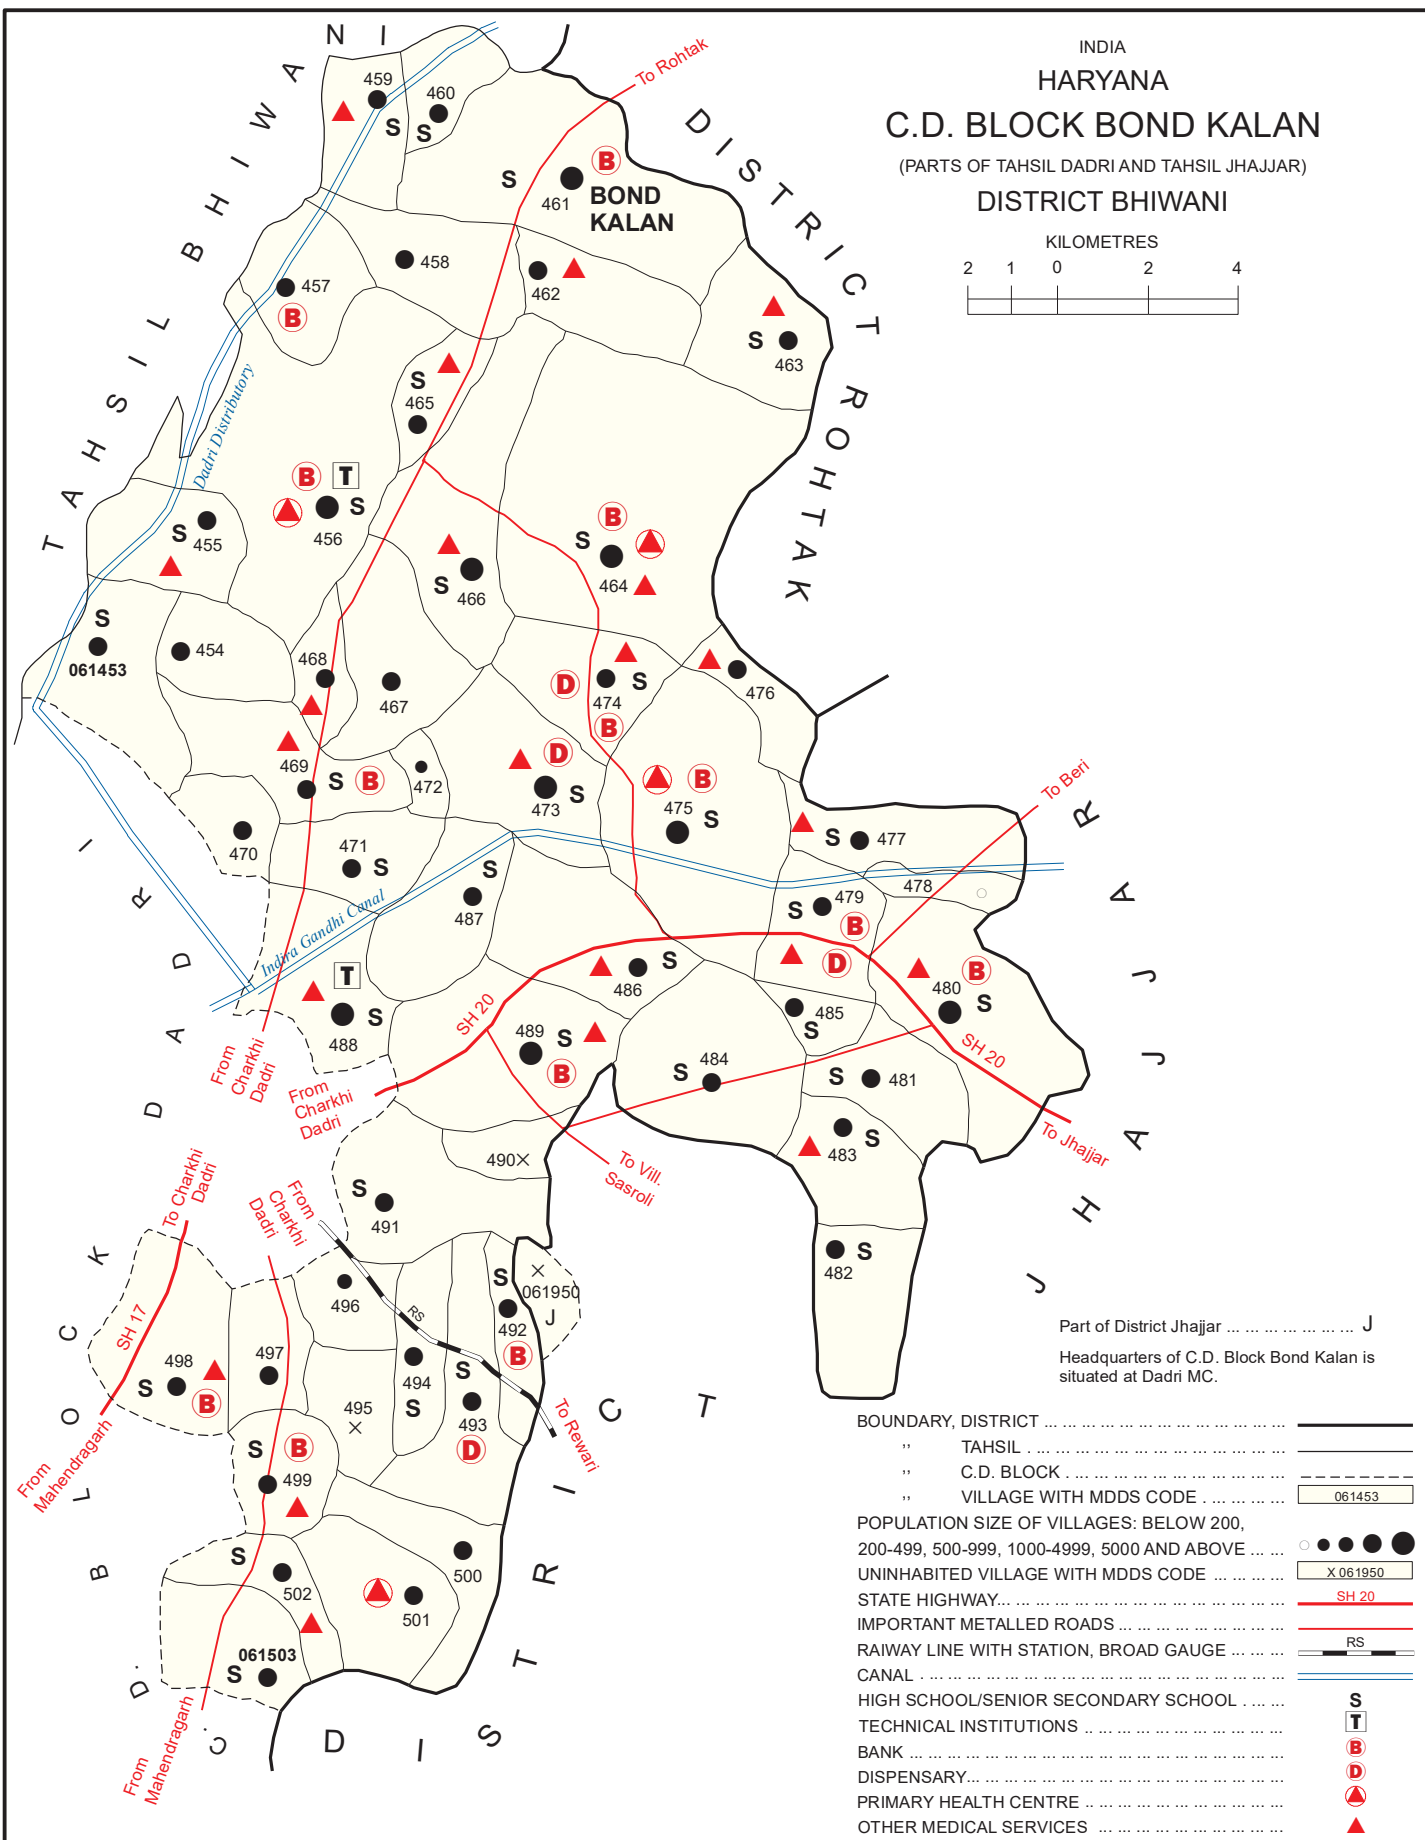

This statement VII provides information on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.
